-- Aiarty, a leading innovator in AI-powered video enhancement solutions, today announced a special 36% off promotion on its flagship product, [Aiarty Video Enhancer](#). The limited-time "Back to School" offer is designed to put the power of crystal-clear learning videos in the hands of students, teachers, and academic researchers, helping them create lessons that are crisper and truly impactful.

The promotion is active now and can be accessed directly on the official Aiarty website at <https://www.aiarty.com/ai-video-enhancer/discount-coupon.htm?ttref=w4bd-aiverele-zh2508-enpr>

Plus: In addition to this campaign, Aiarty also provides exclusive student discounts, offering even greater savings for academic use. Interested students can contact the company via email to apply for and receive these special student-specific offers.

In a modern academic landscape, video has become a cornerstone of communication, research, and project delivery. Yet, as forums and community discussions across platforms like Reddit, Quora, and education-focused blogs reveal, students and faculty frequently encounter frustrating video quality issues that hinder their work. Common challenges include:

- Blurry text on lecture slides that makes note-taking difficult.
- Grainy VHS recordings of classroom sessions from the 1990s and 2000s.
- Low-light or shaky videos from student presentations and research projects.
- Outdated formats that look distorted on modern HD and 4K displays.
- Student-created competition entries or project-application videos that require professional-grade clarity to stand out.

These issues not only hinder comprehension but also reduce the professional impact of educational content. Aiarty Video Enhancer directly addresses these pervasive problems. By leveraging advanced AI algorithm, it can intelligently enhance the video quality of education materials to professional-grade clarity:

**** [AI 4K Upscaling](#):** It can transform low-resolution footage for documentaries or presentations into sharp, high-definition and even 4K quality by generating missing details, making upscaled courses look polished and crystal-clear on any HD & 4K screen.

**** Remove Artifacts from Videos:** Aiarty's AI models are specifically trained to correct common issues that often plague classroom recordings or student projects, including noise, blur, compression artifacts, and more.

**** [Restore Old Videos](#):** For historians and researchers working with digitized film or VHS archives, Aiarty can deinterlace old footage to remove "combing" artifacts, correct faded and washed-out colors, and restore clarity, preserving visual history for future study and analysis.

**** Safe Batch Processing:** Aiarty's 3x faster batch upscaling helps meet tight academic deadlines. All video enhancement is done locally, ensuring the privacy and security of any sensitive research data and personal footage.

"Education should never be held back by poor video quality. Our Back-to-School campaign is about making knowledge clearer, more engaging, and easier to access for everyone in the education community," said Jack Han, CEO of Aiarty. "With Aiarty Video Enhancer, students can produce clearer, more professional-looking video projects and teachers can create more engaging and accessible video learning materials for their students."
