

DealPotential launches AI due diligence feature that eliminates manual data-gathering for private market investors

With its new AI due diligence, DealPotential reduces days of manual data work to seconds, helping investors make faster, smarter private market decisions.

STOCKHOLM, SWEDEN, September 4, 2025 /EINPresswire.com/ --

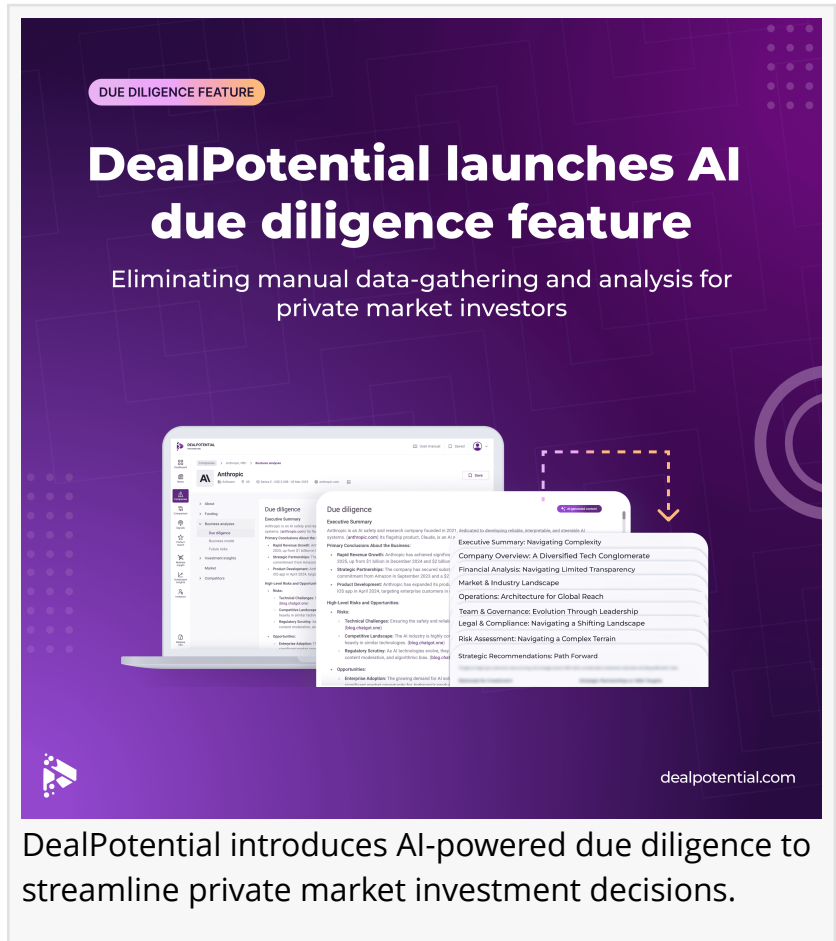

[DealPotential](#), a Swedish investment intelligence company, today announced the launch of an AI-powered due diligence designed to address the significant time and resource constraints faced by investment firms in the private markets. The update aims to mitigate the common practice of making high-stakes investment decisions based on fragmented and manually compiled data.

The AI automatically consolidates and analyzes millions of data points across key due diligence areas. What usually takes analysts weeks is completed by AI in seconds.

"In private markets, the quality and speed of due diligence are often at odds," said Daniel Antonsson, CEO of DealPotential.

"The volume of unstructured data available creates a significant barrier to a thorough analysis. Our AI shifts focus from data gathering to strategic interpretation and decision-making."

In a recent analysis, DealPotential's due diligence surfaced a critical regulatory exposure in a US-based AI company that was missed after two weeks of manual review.

The graphic features a dark purple background with a subtle grid pattern. At the top, a small orange pill-shaped button contains the text "DUE DILIGENCE FEATURE". Below this, the main headline "DealPotential launches AI due diligence feature" is written in large, bold, white sans-serif font. Underneath the headline, a sub-headline in a smaller white font reads "Eliminating manual data-gathering and analysis for private market investors". The central visual is a white laptop displaying the DealPotential AI interface. The screen shows a sidebar with navigation icons and a main content area with a "Due diligence" section. To the right of the laptop, a series of white document cards are fanned out, showing various sections of a report such as "Executive Summary", "Company Overview", "Financial Analysis", "Market & Industry Landscape", "Operations", "Team & Governance", "Legal & Compliance", "Risk Assessment", and "Strategic Recommendations". A dashed orange arrow points from the laptop screen towards these document cards. In the bottom right corner of the graphic, the website "dealpotential.com" is written in a small white font.

DUE DILIGENCE FEATURE

DealPotential launches AI due diligence feature

Eliminating manual data-gathering and analysis for private market investors

dealpotential.com
