Research from the Financial Health Network shows that about 40% of Americans report moderate to high levels of financial stress, with retirement savings and debt among the leading concerns. Lampe, who has more than 19 years of experience in financial services, is gaining national attention for reframing how individuals think about money. Her Amazon bestseller, "Identifying Your Wealth Code DNA™", challenges readers to look beyond budgets and interest rates, urging them to confront the hidden beliefs

that can quietly sabotage long-term financial security.

“The financial pressure people feel right now isn’t just about dollars — it’s about mindset,” said Lampe. “To truly thrive, we have to rewire how we see money itself.”

Recognition Beyond Finance

This year’s Top Influential Women in Business list also features leaders in AI, wellness, and sustainability, reflecting the sectors shaping America’s next decade.
