

# ZyDoc Showcases Disruptive Clinical Documentation Platform at New York Venture Summit 2025; Seeking Seed-Stage Investors

*ZyDoc joins NYVS25 to showcase its AI + human-verified EHR platform, tackling \$100B in documentation losses while raising \$15M seed to scale globally.*

NEW YORK, NY, UNITED STATES, August 29, 2025 /EINPresswire.com/ -- [ZyDoc](https://www.zydoc.com), a leading innovator in healthcare documentation technology, announced its participation in the [New York Venture Summit \(NYVS25\)](https://www.nyvs25.com), taking place this fall. Recognized as one of the premier events for early- and growth-stage companies, NYVS25 will bring together venture capitalists, family offices, angel investors, and corporate partners. ZyDoc will present its AI-augmented, human-verified EHR documentation platform and is actively seeking investment partners to join its \$15 million seed round.

“

We are building the next standard for clinical documentation — one that’s faster, more accurate, and financially transformative for providers worldwide.”

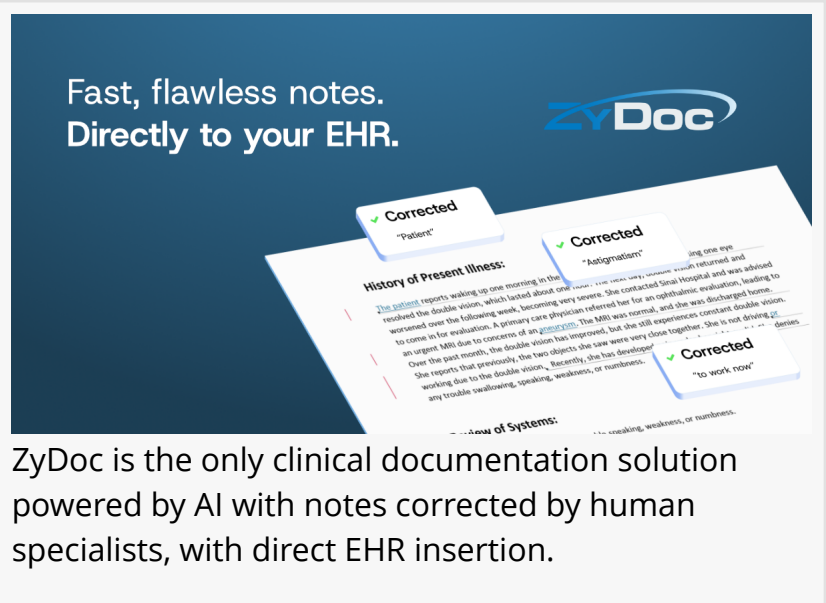

*James Maisel, MD, Founder & CEO of ZyDoc*

## A \$100 Billion Problem

Physician burnout and documentation inefficiency remain among the largest challenges in healthcare. Each year in the U.S. alone, over \$100 billion is lost due to medical documentation errors and inefficiencies. Current “AI-only” solutions frequently fall short, introducing error rates as high as 24% and placing even more burden on clinicians.

ZyDoc solves this problem by combining AI-driven transcription with expert medical language specialists — a

“Humans in the Loop” model that ensures unmatched accuracy, security, and specialty-specific precision. The company’s proprietary TrackDoc Connect™ system inserts structured notes directly into EHRs, eliminating error-prone copy-and-paste workflows and scaling effortlessly

The graphic features a dark blue background with the ZyDoc logo in the top right. On the left, white text reads "Fast, flawless notes. Directly to your EHR." In the center, there is a stylized representation of a medical note with several green checkmarks and the word "Corrected" in blue. The note includes a section titled "History of Present Illness:" followed by a paragraph of text. The text is partially obscured by the "Corrected" labels, which are placed over specific words or phrases, indicating the AI's corrections. The overall design is clean and professional, emphasizing the accuracy and efficiency of the ZyDoc platform.

from single practices to enterprise hospitals.

Proven Results & Market Opportunity  
[Validated by Columbia University and NIH studies](#), ZyDoc has demonstrated: +61% faster documentation than keyboard entry, -76% lower costs than manual methods, and Error rates below 1% with U.S.-based verification.

The economic impact is significant: A typical 10-physician practice can see \$1.38 million in annual revenue uplift whereas a 600-bed hospital can generate \$169 million in added revenue per year. With a global market opportunity exceeding \$1 billion annually in orthopedics and ophthalmology alone, ZyDoc is positioned to scale rapidly across multiple specialties and geographies.

#### Seeking Strategic Investors

ZyDoc is currently raising a \$15 million seed round with preferred equity and discounts. Proceeds will accelerate: expansion into ophthalmology, orthopedics, and ambulatory surgery centers, development of a reseller channel, strategic partnerships, as well as global expansion initiatives, including beachheads in the UAE and Europe. ZyDoc's product roadmap enhancements include speech recognition, hospital integration, and automated coding.

The company has been gaining visibility through the Connectd and Ignyte networks, enabling ZyDoc to engage with leading investors focused on digital health, AI, and medical technology.

#### A Message from Leadership

"ZyDoc is not just another AI scribe," said James Maisel, MD, Founder & CEO of ZyDoc. "We are building the next standard for clinical documentation — one that's faster, more accurate, and financially transformative for providers worldwide. NYVS25 is an incredible opportunity to connect with investors who understand the scale of this problem and the value of our proven solution."
