

# New York Medical Transcription Company is Using Proprietary AI to Unlock a Growing Multi-Billion-Dollar Market

*ZyDoc blends AI + human expertise for faster, error-free EHR notes, tackling the U.S.'s \$100B billing loss while opening a \$15M seed round to scale its market.*

NEW YORK, NY, UNITED STATES, August 29, 2025 /EINPresswire.com/ -- ZyDoc, a leader in medical informatics and next-generation EHR integration, is redefining the way healthcare providers document patient encounters. By combining AI transcription with human medical language specialists, ZyDoc delivers an unprecedented blend of speed,

accuracy, and scalability — solving one of the most costly and overlooked challenges in global healthcare. With membership in the Connectd and Ignyte investor networks, ZyDoc is now opening its \$15 million seed round, presenting a rare opportunity for investors to participate in the company's next stage of growth.

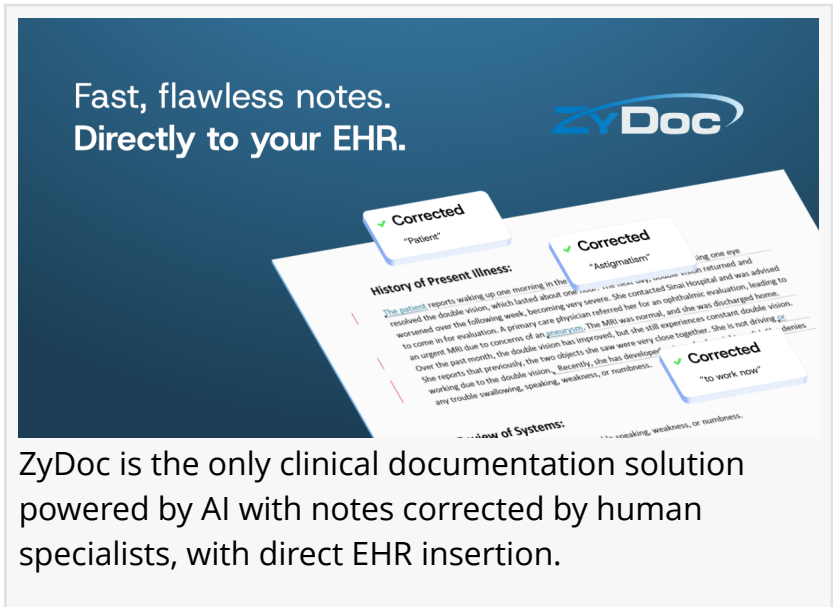

“

Healthcare is drowning in inefficiency and it's costing lives, money, and clinicians' well-being. ZyDoc is building the infrastructure to fix this problem at scale.”

*James Maisel, MD, Founder & CEO of ZyDoc*

## A Global Healthcare Crisis

Documentation inefficiency is a silent epidemic. In the United States alone, \$100 billion is lost annually to medical documentation errors and inefficiencies. These problems scale globally, as physicians everywhere wrestle with clunky EHR systems, rising patient volumes, and burnout. Traditional solutions — scribes, off-the-shelf AI, or manual entry — have proven either too costly, too error-prone, or too disruptive to workflows.

The graphic features a dark blue background with the ZyDoc logo in the top right. On the left, white text reads "Fast, flawless notes. Directly to your EHR." In the center, there is a stack of three white cards. The top card is labeled "Corrected" with a green checkmark and "Patient". The middle card is labeled "Corrected" with a green checkmark and "Astigmatism". The bottom card is labeled "Corrected" with a green checkmark and "to work now". The cards contain snippets of medical text, such as "History of Present Illness:" and "The patient reports waking up one morning in the...".

Fast, flawless notes.  
Directly to your EHR.

ZyDoc

Corrected  
"Patient"

Corrected  
"Astigmatism"

Corrected  
"to work now"

ZyDoc is the only clinical documentation solution powered by AI with notes corrected by human specialists, with direct EHR insertion.

ZyDoc changes this equation. Its platform offers: -Direct EHR insertion through TrackDoc Connect™, eliminating copy/paste errors, -Humans-in-the-Loop verification for <1% error rates,

-61% faster documentation vs. typing,  
and 76% lower costs vs. manual  
transcription, and -Scalability from  
small clinics to enterprise hospitals,  
with zero IT burden.

## Market Impact

[ZyDoc's financial outcomes are as compelling as its clinical ones: a single](#)

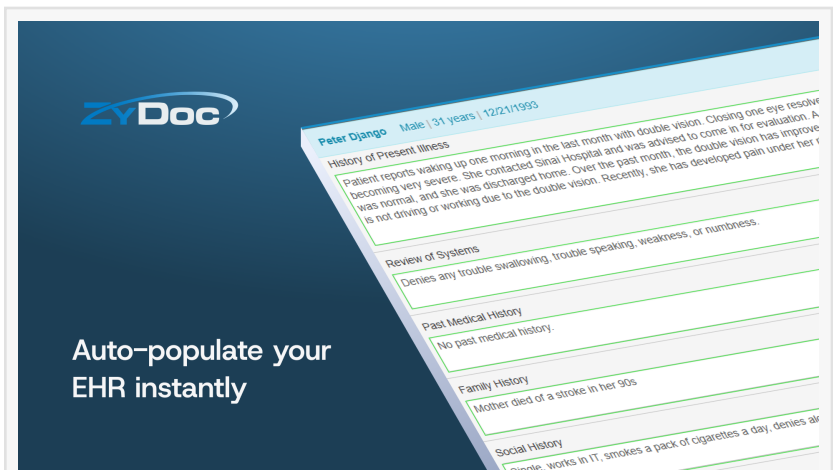

physician can realize \$137,600 in additional annual revenue whereas a 10-clinician practice can generate \$1.38 million more per year; a 600-bed hospital can unlock \$169 million in uplift annually. Globally, the total addressable market for orthopedics, ophthalmology, and ambulatory surgery centers exceeds \$1.3 billion annually. Expanding into broader hospital and specialty care represents an even larger opportunity.

## Why ZyDoc is a Game-Changer for Investors

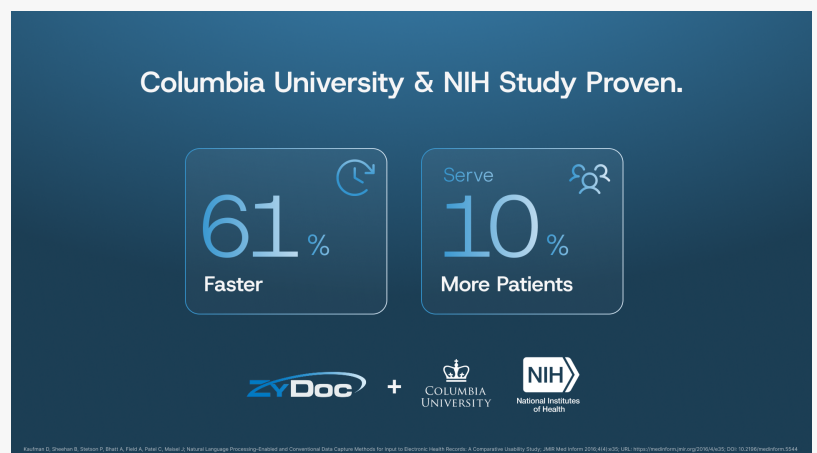

ZyDoc is more than a clinical tool — it is a healthcare productivity engine that turns documentation into a source of economic gain, compliance assurance, and physician well-being. With its proven model, ZyDoc is positioned to: capture high-value partnerships with hospitals, clinics, and enterprise systems worldwide, scale internationally, with planned beachheads in Europe, the Middle East, and Asia, advance its product roadmap, including automated coding, speech recognition, and analytics, and deliver predictable ROI in a market with few true competitors that combine AI, human verification, and direct EHR integration.

## Backed by Networks that Matter

Through its participation in the Connectd and Ignyte investor communities, ZyDoc is actively engaging with leading VCs, family offices, and angel investors who recognize the value of disruptive healthtech platforms. This visibility accelerates ZyDoc's ability to secure strategic capital and scale faster.

ZyDoc directly integrates into existing EHR systems without clinician-IT burden or cut & paste.

Columbia University & NIH Usability Study reveals a 61% increase in speed due to ease of use and estimates a 10% increase in practice efficiency; revenue uplift can exceed \$130k per physician per year as a result.

## A Message from Leadership

"Healthcare is drowning in inefficiency — and it's costing lives, money, and clinicians' well-being," said James Maisel, MD, Founder & CEO of ZyDoc. "ZyDoc is building the infrastructure to fix this problem at scale. We're proud to be part of the Connectd and [Ignyte networks](#) as we open our seed round to investors who see the magnitude of this opportunity."

## About ZyDoc

ZyDoc is a U.S.-based healthcare technology company delivering AI-augmented, human-verified clinical documentation with seamless EHR integration. Recognized with national innovation awards, validated by academic studies, and trusted by providers across specialties, ZyDoc is scaling globally to improve documentation accuracy, reduce physician burnout, and unlock new revenue streams for healthcare systems.
