

Master Fire Prevention Achieves 99.5% Success Rate in FDNY & ECB Violation Removal for NYC Restaurants

Master Fire Prevention today announced that it has achieved a 99.5% success rate in removing FDNY and Environmental Control Board (ECB) violations

NEW YORK, NY, UNITED STATES, August 29, 2025 /EINPresswire.com/ -- Master Fire Prevention, a leading [FDNY](#)-approved fire protection services company, today announced that it has achieved a 99.5% success rate in removing FDNY and Environmental Control Board (ECB) [violations](#) for New York City [restaurants](#). The milestone highlights the company's reputation as a trusted compliance partner for restaurants across all five boroughs.

“

Our 99.5% success rate proves Master Fire is the trusted partner NYC restaurants rely on to resolve fire, smoke, and odor violations quickly and effectively.”

Peter Martinez

The announcement comes as NYC regulators continue to increase enforcement around kitchen exhaust systems, fire suppression units, fire extinguisher inspections, and

pollution control units (PCUs). Restaurants are receiving violations not only for fire hazards but also for smoke and odor infractions issued by the ECB. Left unaddressed, these violations can lead to heavy fines, interrupted operations, or even forced closures.

“Our clients operate in one of the most demanding regulatory environments in the country,” said [Executive Name], [Title] at Master Fire Prevention. “Achieving a 99.5% success rate is a reflection of our technical expertise and commitment to New York City’s hospitality industry. In the rare cases where full resolution is not possible due to building limitations or budget constraints, we still provide solutions that minimize risk and keep restaurants operating.”

Master Fire’s comprehensive violation removal service includes:

Immediate site assessments

Corrective system repairs and retrofits

FDNY and ECB paperwork management

UL300 suppression upgrades

Ventless hood and pollution control unit installations

Advanced air-cleaning systems, including electrostatic precipitators and brands such as SMOG HOG, Captive Aire, Trion, Accurex, and Air Quality Control Engineering

Preventive inspection and maintenance programs to avoid repeat violations
