

# Coalition for Radical Life Extension Launches Global Longevity Mobilization

*The Coalition for Radical Life Extension launches Longevity Mobilization Project to expand awareness, education, and access to longevity science.*

SCOTTSDALE, AZ, UNITED STATES, August 29, 2025 /EINPresswire.com/ -- The [Coalition for Radical Life Extension](#) today announced the launch of its [Longevity Mobilization Project](#), a global effort to expand awareness, education, and access to longevity science so more people can benefit from proven innovations. The initiative was introduced at [RAADfest](#) 2025, marking the conference's 10th year as a leading gathering on age-reversal and longevity.

Longevity Mobilization Project, a global effort to expand awareness, education, and access to longevity science so more people can benefit from proven innovations. The initiative was introduced at RAADfest 2025, marking the conference's 10th year as a leading gathering on age-reversal and longevity.

“

RAADfest has united people dedicated to extending healthy lifespan. The Longevity Mobilization Project builds on that legacy with safety, transparency, and responsibility at its core.”

*James Strole, Executive Director*

“For ten years, RAADfest has brought together people who believe in extending healthy human lifespan,” said James Strole, Executive Director. “The Longevity Mobilization Project builds on that success while reaffirming our commitment to doing this work responsibly, transparently, and always with participant safety as a top priority.”

The Longevity Mobilization Project is designed to empower the longevity ecosystem through three areas of focus:

- Education: Expanding access to reliable longevity information and learning opportunities.
- Public Policy: Advocating for clear regulatory pathways to

bring longevity innovations responsibly to patients.

- Access: Developing tools, including an online platform, to connect people with the latest science on extending healthy lifespan.

At a recent Coalition-hosted webinar, longevity leaders from Africa, Europe, Asia, and North America shared regional updates and ideas for collaboration. These insights will help shape future phases of the project and guide strategies for global cooperation.

As part of its advocacy efforts, the Coalition is also rallying public support for policy initiatives that would accelerate patient access to treatments while ensuring safety and oversight.
