

South Florida Yacht Broker Featured in Waterfront Times for Proven Hurricane Survival Strategy

Kevin St. Clair of St. Clair Superyachts Shares 100% Storm Survival Method Amid Peak Hurricane Season

FORT LAUDERDALE, FL, UNITED STATES, September 1, 2025 /EINPresswire.com/ -- With 75% of hurricane season still ahead and meteorologists warning of heightened Atlantic activity, Waterfront Times has spotlighted South Florida yacht broker Kevin St. Clair for his proven "100% storm survival strategy." St. Clair, Founder of St. Clair Superyachts, developed the method over nearly three decades and more than 200,000 nautical miles at sea — including real-world hurricane encounters where every vessel under his care survived intact.

St. Clair Superyachts CEO Kevin St. Clair

St. Clair, Founder of St. Clair Superyachts, has served as captain, engineer, and project manager aboard multimillion-dollar yachts worldwide. His survival approach was shaped during Hurricane Wilma in 2005, when he successfully safeguarded a yacht directly in the storm's path.

“

Most hurricane manuals miss the one factor that determines whether a yacht survives: understanding the triple-threat of wind angles, tide timing, and surge mechanics in real-time”

Kevin St Clair

“Most hurricane manuals miss the one factor that determines whether a yacht survives: understanding the triple-threat of wind angles, tide timing, and surge mechanics in real-time,” said St. Clair. “Our strategy isn’t theory — it’s based on results. Every vessel I’ve positioned with this method has come through intact.”

The Waterfront Times feature (September 2025 issue) highlights how St. Clair's survival strategy provides actionable guidance for yacht owners, focusing on the critical role of tide timing, dock configuration, and line setup. With meteorologists and news outlets revisiting historical storm data, the article provides fresh, real-world insights just as hurricane activity peaks in the Atlantic.
