

Nanoparticle Titanium Dioxide Market Analysis of Rising Business Opportunities by 2030 | AMR

The global nanoparticle titanium dioxide market is projected to reach \$17.3 billion by 2030, growing at a CAGR of 6.1% from 2021 to 2030.

WILMINGTON, DE, UNITED STATES, September 1, 2025 /EINPresswire.com/ -- Global [Nanoparticle titanium dioxide market](#) is analyzed across several

regions such as North America, Europe, Asia-Pacific, and LAMEA. The market across Asia-Pacific held the lion's share in 2020, accounting for nearly two-fifths of the market. In addition, the region is anticipated to portray the highest CAGR of 6.6% during the forecast period.

The global nanoparticle titanium dioxide market includes an in-depth analysis of the prime market players such as Cabot Corporation, BASF SE, Croda International Plc, Cinkarna Celje d.d., Kronos Worldwide, Inc., Evonik Industries AG, The Chemours Company, Tayca Corporation, Venator Materials Plc., and Tronox Holdings Plc.

The global nanoparticle titanium dioxide market was pegged at \$9.7 billion in 2020, and is expected to reach \$17.3 billion by 2030, growing at a CAGR of 6.1% from 2021 to 2030.

Rise in awareness regarding effects of UV rays among consumers, surge in demand for passive protective coatings, trend toward environmental sustainability, and approval from regulatory bodies drive the growth of the global nanoparticle titanium dioxide market. However, the adverse effects of nanoparticle titanium dioxide on marine life and the environment and toxicity at high concentrations hinder the market growth. On the contrary, surge in disposable income in developing economies and expanding paints & coatings, pigments, and cosmetic industries are expected to open lucrative opportunities for the market players in the future.

Based on type, the report is divided into rutile, anatase, and combination of rutile & anatase. The rutile segment held the largest share in 2020, accounting for around two-fifths of the market. However, the segment is projected to register the highest CAGR of 6.4% during the forecast period.

On the basis of application, the report is classified into paints & coatings, pigments, cosmetics, plastics, energy, and others. The paints & coatings segment held the largest share in 2020, contributing to nearly two-fifths of the market. However, the pigments segment is estimated to manifest the highest CAGR of 7.1% from 2021 to 2028.

The report segments the global nanoparticle titanium dioxide market on the basis of type, application, and region.
