Rise in use of linalool in cosmetics & toiletries and increased demand for plant based raw materials in various consumer products drive the growth of the global linalool market. On the other hand, constraints such as low consumer awareness of these industrial products and strict rules against chemical industries restrain the growth to some extent. However, rise in demand for perfumes, body deodorants, soaps, and other personal care products is anticipated to create lucrative opportunities in the industry.

The global linalool market is analyzed across type, application, end-user, and region.

Based on type, the synthetic segment held the major share in 2020, garnering 93% of the total market. The natural segment, however, would cite the fastest CAGR of 6.4% during the forecast

period.

By application, the essential oils segment accounted for around four-fifths of the total market revenue in 2020, and is anticipated to retain its dominance by 2030. The sedative segment, on the other hand, would grow at the fastest CAGR of 4.8% from 2021 to 2030.
