The Business Research Company

projected to expand from \$3.26 billion in 2024 to \$3.46 billion in 2025, at a compound annual growth rate (CAGR) of 6.2%. The historic growth can be attributed to factors such as an increase in government expenditure on public infrastructure, a rise in the demand for modular construction, an upswing in renovation and remodeling activities, its utilization in industrial construction, and a boom in highway and road construction.

There's an anticipation of sturdy expansion in the film faced plywood market size in the forthcoming years, with

projections of growth to \$4.36 billion by 2029 and a compound annual growth rate (CAGR) of 5.9%. Factors prompting development during this predictive period are swift urbanization in developing countries, surge in housing construction projects, broadening of commercial property sector, upsurge in infrastructure projects, and initiatives towards smart cities. The forecast period also indicates some significant trends showing the incorporation of modern adhesives and coatings, inception of lightweight FFP models, innovative core materials for enhanced sturdiness, automation in production processes to boost product quality, and CNC-compatible sheets facilitating accurate construction.

What Are The Key Factors Driving Growth In The Film Faced Plywood Market?

The surge in construction activities is predicted to boost the film faced plywood market's expansion. Building activities encompass all procedures involved in constructing, altering or deconstructing physical structures like infrastructure and buildings. The rise of such activities is due to quick urbanization, necessitating more commercial, residential and infrastructure projects to support growing urban populations. Film faced plywood, with its outstanding water resistance, facilitates construction tasks by offering durable performance and reusability in concrete formwork, even in rigorous conditions. For example, the Census Bureau, a US government agency, reported in July 2025 that the seasonally adjusted annual rate for public construction spending was approximately \$511.6 billion in May, denoting a 0.1% increase compared to the revised figure of \$511.3 billion in April. Hence, the surge in construction activities is propelling the film faced plywood market's growth. Real Estate Investments' Upward Trend Boosts the Market's Expansion Due to the Increasing Use in Concrete Formwork

What Are The Top Players Operating In The Film Faced Plywood Market?

Major players in the Film Faced Plywood Global Market Report 2025 include:

- Bunnings Group
- Boise Cascade Co.
- Tianjin Wellmade Scaffold Co. Ltd.
- Vinawood Co. Ltd.
- Welde GmbH
- Shandong Chanta Plywood Co. Ltd.
- Latvijas Finieris Group Companies
- Magnus International Group
- NOE-Schaltechnik
- Paam Group Inc.

What Are The Main Trends, Positively Impacting The Growth Of Film Faced Plywood Market?

Leading businesses in the film faced plywood industry are prioritizing the expansion of their production capabilities, with the objective of introducing fresh product lines and spurring business growth. These facilities are designated areas equipped with the requisite technology, components and workforce to manufacture or assemble products. For instance, Boise Cascade, a manufacturer of film faced plywood based in the US, revealed an investment of \$75 million in January 2024. This capital injection is aimed at boosting and widening crucial equipment spaces at its Oakdale facility situated in Allen Parish. Boise Cascade has initiated an expansion in its Oakdale unit to enhance the output of dry veneers, vital components in film faced plywood. This augmentation is projected to enhance production by 30%, amounting to approximately 400 million square feet per annum. As an integral part of the undertaking, a six-deck veneer dryer and press are planned for installation, the log utilization center is set for an enhancement, and a pre-existing dryer is scheduled for an upgrade. These advancements are in line with the company's aim to smoothen operations and strengthen manufacturing capabilities. The surplus

veneers yielded will also directly benefit the firm's engineered wood products facility in Central Louisiana.

Comprehensive Segment-Wise Insights Into The Film Faced Plywood Market

The film faced plywood market covered in this report is segmented –

- 1) By Product Type: Birch Film Faced Plywood, Poplar Film Faced Plywood, Hardwood Film Faced Plywood, Other Product Types
- 2) By Thickness: 3mm - 12mm, 13mm - 18mm, 19mm - 24mm, Above 24 mm
- 3) By Distribution Channel: Online Stores, Offline Stores
- 4) By Application: Construction, Industrial, Furniture, Other Applications

Subsegments:

- 1) By Birch Film Faced Plywood: Smooth Surface Birch, Wire Mesh Birch, Anti-Slip Birch
- 2) By Poplar Film Faced Plywood: Full Poplar Core, Poplar With Hardwood Face, Poplar With Combi Core
- 3) By Hardwood Film Faced Plywood: Full Hardwood Core, Hardwood With Poplar Core, Mixed Hardwood Types
- 4) By Other Product Types: Bamboo Film Faced Plywood, Eucalyptus Film Faced Plywood, Composite Core Plywood
