

Antiemetic Drugs Market Poised for Strong Growth Amid Rising Cancer & Chemotherapy Cases Worldwide 2025

The Global Antiemetic Drugs Market is expected to grow at a CAGR of 5.5% during the forecast period (2025-2033).

AUSTIN, TX, UNITED STATES, September 2, 2025 /EINPresswire.com/ -- DataM Intelligence — The Global [Antiemetic Drugs Market](#), essential for managing nausea and vomiting across diverse settings such as chemotherapy, surgery, and pregnancy, achieved an estimated USD 7.47 billion in 2024. The market is projected to rise at a CAGR of approximately 5.5%, reaching USD 12.07 billion by 2033.

Regional Highlights: U.S. & Japan:

USA:

The Antiemetic Drugs Market is growing steadily, driven by rising cases of nausea and vomiting from chemotherapy, pregnancy, and surgeries, boosting demand globally.”

DataM Intelligence

August 28, 2025 - Pfizer announced promising trial results for a next-generation NK1 receptor antagonist enhancing chemotherapy-induced nausea treatment.

Market growth driven by rising cancer cases and novel drug delivery systems like transdermal patches and fast-dissolving films improving patient adherence.

Japan:

June 24, 2025 - Japan's antiemetics market growth attributed to rising cancer cases and adoption of

aggressive chemotherapy, with new NK1 and serotonin antagonist drugs advancing treatment.

Government regulatory support and growing healthcare expenditure facilitated approvals of innovative antiemetic drugs, boosting market expansion.

Emerging Growth Region: Asia-Pacific:

Asia-Pacific is fast becoming the highest-growth regional market, with CAGR estimates as high as 6.7% between 2024 and 2030. Expanding cancer care services, broader drug availability, and improving reimbursement systems especially in China and India are key drivers.

1. Industry News (Last 3 Months):

- A recent focus in oncology care involves fixed-dose combinations like netupitant–palonosetron, which offer effective prevention of both acute and delayed chemotherapy-induced nausea and vomiting (CINV), improving patient adherence and comfort.

2. Recent M&A Activity:

- The broader pharmaceutical sector is experiencing renewed M&A activity in 2025, as companies pursue strategic growth and innovation. While not specific to antiemetics, this trend signals heightened consolidation and investment momentum across therapeutic areas.

3. Regulatory or Policy Updates – U.S. & Japan:

- U.S.: No recent policy changes specific to antiemetic drugs; however, continued reimbursement for chemotherapy supportive care remains favorable.
- Japan: No new regulations noted; existing NHI policies ensure antiemetic drugs are accessible as needed for cancer protocols.

4. Product Launches in the Last 3 Months:

- No newly launched antiemetic therapies have been publicly reported in this period. Development efforts continue to emphasize combinations and formulations that enhance tolerance and convenience for patients undergoing chemotherapy.

Market Segmentation:

By Drug Type: 5-HT3 Receptor Antagonists, Dopamine antagonists, Steroid-Corticosteroids,

Benzodiazepines, NK1 receptor antagonist, Antihistamines, Cannabinoids, Anticholinergic.

By Application: Chemotherapy, Pregnancy, Motion Sickness, Food Poisoning, Gastroenteritis, Dizziness, General Anesthetics, Opioid Analgesics, Emotional Stress.

By End-User: Hospital, Clinic, Nursing Home, Other.

By Region: North America, Latin America, Europe, Asia Pacific, Middle East, and Africa.

Market Leaders & Strategic Landscape:

Leading antiemetic drug companies include:

Sanofi

GlaxoSmithKline Pharmaceuticals Limited

Johnson & Johnson

Merck & Co.

Novartis AG

Bristol-Myers Squibb

Astellas Pharma, Inc.

Eli Lilly and Company

Abbott

Dr. Reddy's Laboratories.
