Drivewyze Safety+ offers real-time alerts for high-risk areas such as rollover zones, high-speed intersections, and upcoming work zones. It requires no additional hardware and integrates seamlessly into existing in-cab telematics systems. Fleets using the service have seen measurable improvements in safety outcomes and driver engagement.

For Loadsure, the partnership reflects its commitment to delivering smarter, tech-forward protection for its policyholders.

“Fleetworthy shares our belief that modern fleet safety is about more than compliance. It’s about enabling smarter operations and reducing friction,” said Michael Kennedy, VP of Global Partnerships at Loadsure. “We’re proud to bring Drivewyze to our agents and fleet policyholders as part of our broader mission to protect every shipment and the people behind it.”

Together, the two companies aim to provide fleet operators with greater visibility, protection, and peace of mind in an increasingly complex logistics environment.
