Driving Factors

Surge in need for social media analytics and predictive analytics for businesses is boosting the growth of the global text analytics market. In addition, rise in highly customized and industry-specific applications is positively impacting the growth of the market. However, lack of awareness regarding text analytics, skilled workforce, and other operational challenges and data privacy and security concerns hamper the market growth. On the contrary, enhanced customer service and competitive intelligence are expected to offer remunerative opportunities for expansion of the market during the forecast period.

Market Segmentation

The global text analytics market is segmented into component, deployment model, enterprise size, application, industry vertical, and region. By component, the market is bifurcated into software and services. On the basis of deployment model, it is categorized into on-premises and cloud. Depending on enterprise size, the market divided into large enterprises and SMEs. The applications covered in the study include customer experience management, marketing management, governance, risk, and compliance management, document management, workforce management, and others. As per industry vertical, the market is fragmented into

retail, BFSI, travel & hospitality, media & entertainment, healthcare, IT & telecom, and others. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Key Players

The key players profiled in the text analytics market analysis are Clarabridge, Inc., IBM, Luminoso Technologies, Inc., Megaputer Intelligence, Inc., Microsoft Corporation, Micro Focus LLC, Open Text Corporation, Oracle Corporation, SAP SE, and SAS. These players have adopted various strategies to increase their market penetration and strengthen their position in the text analytics industry.

Based on region, North America held the highest market share in terms of revenue 2020, accounting for nearly one-third of the global text analytics industry, owing to high adoption of text analytics solutions across end-user segments such as BFSI, retail, and healthcare and increasing investments in new technologies such as data analytics, big data, and machine learning. Moreover, the Asia-Pacific region is expected to witness the fastest CAGR of 19.3% during the forecast period, owing to, evolving consumer trends in the region and high population density enabling business better customer insights.

Based on component, the software segment held the highest market share in 2020, accounting for nearly three-fifths of the global text analytics market, and is estimated to maintain its leadership status throughout the forecast period. This is because it enables faster data extraction, data categorization, sentiment analysis, helping differentiate between people, and named entity recognition (NER), and even identifying the context. Moreover, the service segment is projected to manifest the highest CAGR of 19.1% from 2021 to 2030, as it helps organizations evaluate billions of points of view from a million people and determine the best course of action for their products (and even their brand as a whole) based on their customers' preferences to assure customer happiness and increase revenues.

Based on deployment model, the on-premise segment accounted for the largest share in 2020, contributing to nearly three-fifths of the global text analytics market, and is projected to maintain its lead position during the forecast period. This is due to the fact that as it allows to be hosted within the organization's network, giving the organization superior control over the functionality and performance of the software. However, the cloud segment is expected to portray the largest CAGR of 18.8% from 2021 to 2030, as it helps in rapid scalability and flexibility of cloud-based deployments along with further cost-effectiveness of this solution.

COVID-19 Scenario

□ The text analytics market has witnessed stable growth during the COVID-19 pandemic, owing to rise in investments in emerging technologies, such as artificial intelligence and machine learning.

□ Moreover, text analytics is being widely adopted by small and medium-sized enterprises (SMEs) to gain results in real-time, make strategic decisions, and resolve customer issues at priority basis.

□ In addition, text analytics identify actionable insights by aggregating text analysis results and incorporating business intelligence (BI) tools or easy-to-understand reports and graphics. This is positively influencing its utilization in the media, retail, healthcare, travel & tourism, military and defense, information technology (IT) & telecommunication, and banking, financial services, and insurance (BFSI) sectors.
