What Is The Expected Cagr For The Gymnasium Floors Market Through 2025?

In recent times, the market size for gymnasium floors has seen robust growth. The projections indicate that this market will escalate from a worth of \$1.83 billion in 2024 to a value of \$1.94 billion in 2025, proliferating at a compound annual growth rate (CAGR) of 6.4%. Factors such as heightened participation in school and college sports, an uptick in indoor sports activities, surging demand for multipurpose gymnasiums, increased recognition of sports-related injuries, and the growing trend of fitness and wellness have all contributed to the growth in the historical period.

The [market size of gymnasium floors](#) is predicted to

witness a robust increase in the upcoming years, expected to reach the value of \$2.46 billion in 2029 with a compound annual growth rate (CAGR) of 6.1%. Factors contributing to this anticipated growth during the forecast period include a rise in investments in sports facilities, an increase in the use of environmentally friendly flooring materials, a surge in both professional and amateur sports leagues, growth in urban recreational hubs, and a growing preference for modular and portable flooring systems. The forecast period also foresees key trends such as improvement in shock absorbing floor technologies, the implementation of smart flooring solutions, technological progression in floor materials, innovation in noise dampening layers,

and the merging of digital performance tracking.

### What Are The Driving Factors Impacting The Gymnasium Floors Market?

The gymnasium floors market is poised for growth, driven by a rise in sports activity participation. Sports activities, defined as structured physical games and contests involving expertise, tactics, and physical effort, typically played individually or in teams, are experiencing increased participation due to a growing health consciousness in people. This has led to a surge in regular physical workouts and organized sports engagement. Greater sports activities, in turn, fuel the need for superior indoor amenities, promoting the fitting and improvement of gymnasium floors for safer and more durable play areas. For instance, the National Federation of State High School Associations (NFHS), a U.S.-based establishment dedicated to high school sports and fine arts programs, reported that high school sports participation escalated to 8,062,302 participants in 2023-24, marking an increase of 210,469 compared to the prior year. Consequently, the upswing in sports activity involvement is spurring the expansion of the gymnasium floors market.

### Which Players Dominate The Gymnasium Floors Industry Landscape?

Major players in the Gymnasium Floors Global Market Report 2025 include:

- Gerflor
- Polyflor Ltd
- Ecore International
- Robbins Sports Surfaces
- Pulastic sports flooring
- Boen
- Connorsports Flooring Corporation
- Taraflex
- BAUWERK GROUP UK LTD
- Sport Court

### What Are The Prominent Trends In The Gymnasium Floors Market?

Key players in the gymnasium flooring market are putting their efforts into designing innovative solutions such as environmentally-friendly floors, aiming to increase sustainability and lessen ecological damage while not compromising their durability and performance. Eco-friendly flooring refers to floor materials and products that are made from sustainable, recycled or naturally sourced elements and designed to reduce environmental harm throughout their entire lifecycle, from manufacture to disposal. For example, in May 2025, Sprung Gym Flooring, a company based in the UK that specializes in high-quality gym flooring solutions, introduced Java Tile. It is a trailblazing, green gym flooring solution that is made from recycled coffee grounds. Each tile is 20mm thick and contains a blend of 30% spent coffee grounds and rubber granules, resulting in a surface that can absorb shocks and is suitable for medium to high impact workout

regimes. This breakthrough product not only delivers superior performance, but also emits a faint coffee scent, adding to the overall workout experience. Java Tile has been tested and approved by professional athletes and gym owners due to its ability to regulate heat, reduce noise, and require minimal maintenance.

#### [Global Gymnasium Floors Market Segmentation](#) By Type, Application, And Region

The gymnasium floors market covered in this report is segmented –

- 1) By Type: Hardwood, Vinyl, Polyurethane, Rubber, Foam, Other Types
- 2) By Material Type: Maple, Oak, Pine
- 3) By Regulatory Standards: Fédération Internationale de Football Association Quality Certifications, International Organization For Standardization Standards
- 4) By Application Type: Basketball, Volleyball, Gymnastics
- 5) By End-User: Education Sector, Commercial Sports Facilities, Residential Gyms, Government And Military Facilities

Subsegments:

- 1) By Hardwood: Maple, Oak, Beech
- 2) By Vinyl: Heterogeneous Vinyl, Homogeneous Vinyl, Luxury Vinyl Tiles (LVT)
- 3) By Polyurethane: Poured PU Systems, Sandwich PU Systems, Indoor PU Coatings
- 4) By Rubber: Rolled Rubber, Interlocking Rubber Tiles, Vulcanized Rubber
- 5) By Foam: EVA Foam Mats, Polyethylene Foam Tiles, Interlocking Foam Panels
- 6) By Other Types: Bamboo Flooring, Engineered Wood, Synthetic Composite Flooring
