Ennabl Launches Docs Compare to Streamline Insurance Document Review

EnnablDocs Compare empowers brokers with AI-driven clarity—cutting review time, reducing errors, and strengthening client trust in every policy check.

GREENWICH, CT, UNITED STATES, September 3, 2025 /EINPresswire.com/ -- Ennabl, the leading provider of intelligent data solutions for insurance brokers and agencies, today announced the launch of Docs Compare, the latest enhancement to the EnnablDocs platform.

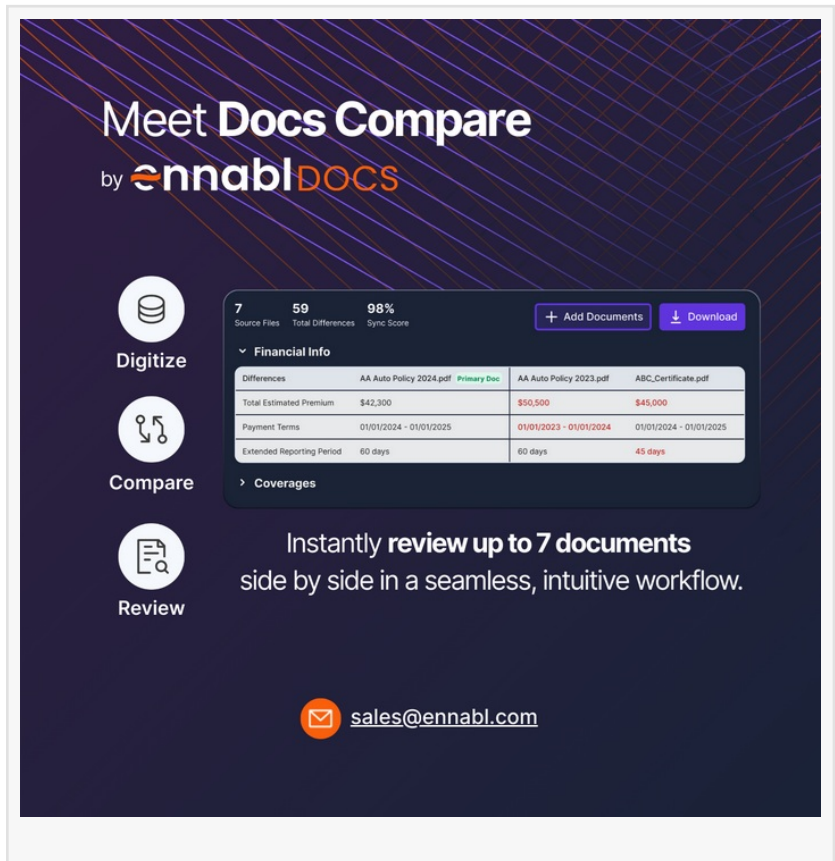

Docs Compare is designed to eliminate the time-consuming and error-prone process of document review by enabling insurance professionals to compare up to seven documents side-by-side with unmatched speed and accuracy.

Insurance professionals frequently spend hours manually cross-checking PDFs—such as policies, quotes, and applications—to identify discrepancies that may result in errors, delays, or even E&O exposure. Docs Compare automates this process, providing clear, actionable insights within minutes. This solution extends beyond basic policy checking by allowing comparisons across certificates, forms, and other insurance documents to identify variations in coverage or exclusions.

"With Docs Compare, we are addressing one of the most significant operational challenges facing insurance professionals today," said Kabir Syed, Chief Executive Officer of Ennabl. "Our goal is to provide clarity, not complexity. Docs Compare equips brokers with precise, structured insights that reduce risk, save valuable time, and strengthen client relationships."

Key capabilities of Docs Compare include:
- Simultaneous comparison of up to seven documents

"

> Our goal is to provide clarity, not complexity. Docs Compare equips brokers with precise, structured insights that reduce risk, save valuable time, and strengthen client relationships."
> *Kabir Syed, CEO of Ennabl*

- AI-powered detection of discrepancies with high accuracy
- Reduction in review times, minimizing manual errors and enabling greater focus on client service

Docs Compare is powered by Ennabl's advanced artificial intelligence pipelines, which integrate large language models (LLMs), computer vision, and proprietary pre- and post-processing to deliver trusted document intelligence for insurance professionals.

About Ennabl

Ennabl provides intelligent data solutions that empower insurance brokers and agencies to drive growth, efficiency, and client satisfaction. By leveraging advanced artificial intelligence, Ennabl delivers tools that streamline workflows, reduce risk, and unlock actionable insights. For more information, visit www.ennabl.com.
