

LightPath Technologies Marks 40 Years of Innovation in Optical and Infrared Solutions

LightPath Technologies celebrates 40 years of innovation delivering advanced imaging technologies for defense, industrial, automotive, and medical markets.

ORLANDO, FL, UNITED STATES, September 3, 2025 /EINPresswire.com/ -- LightPath Technologies (NASDAQ: LTPH), a global leader in optical and infrared imaging solutions, today announced the celebration of its 40th anniversary. Since its founding in 1985, LightPath has built a legacy of innovation in advanced optics, thermal imaging, and proprietary materials, helping aerospace, defense, and industrial leaders gain a competitive edge.

LightPath thermal imaging optics manufacturing

Over four decades, LightPath has expanded its portfolio through organic innovation and strategic acquisitions, including Geltech, Horizon Photonics, ISP Optics, Visimid, and G5. The company pioneered breakthroughs such as germanium-free Black Diamond™ glass and the Mantis multispectral camera, while building a reputation for reliability, precision, and client-centric collaboration.

“Reaching 40 years is both a milestone and a springboard,” said Sam Rubin, President and CEO of LightPath Technologies. “We’ve transitioned from being known primarily as a component manufacturer to becoming a solutions partner that helps our customers solve their most complex imaging challenges. This shift is central to how we create sustainable growth by moving away from commoditization and instead delivering integrated solutions that generate long-term value. Our focus on innovation, vertical integration, and close collaboration with our customers is what sets LightPath apart.”

LightPath’s growth strategy centers on expanding its presence in defense and industrial markets while entering high-growth verticals such as automotive and medical imaging. By leveraging its
