

Bonsai Koin Launches Beta Testing for BOKO Faucet App, Combining Cryptocurrency Innovation with Environmental Impact

NEW YORK, NY, UNITED STATES, September 3, 2025 /EINPresswire.com/ -- NEW [Bonsai Koin](#) (BOKO), a cryptocurrency project operating on the Binance Smart Chain, today announced the beta testing phase of its [BOKO Faucet app](#) for Android devices, marking a significant milestone in the company's mission to merge digital finance with environmental sustainability.

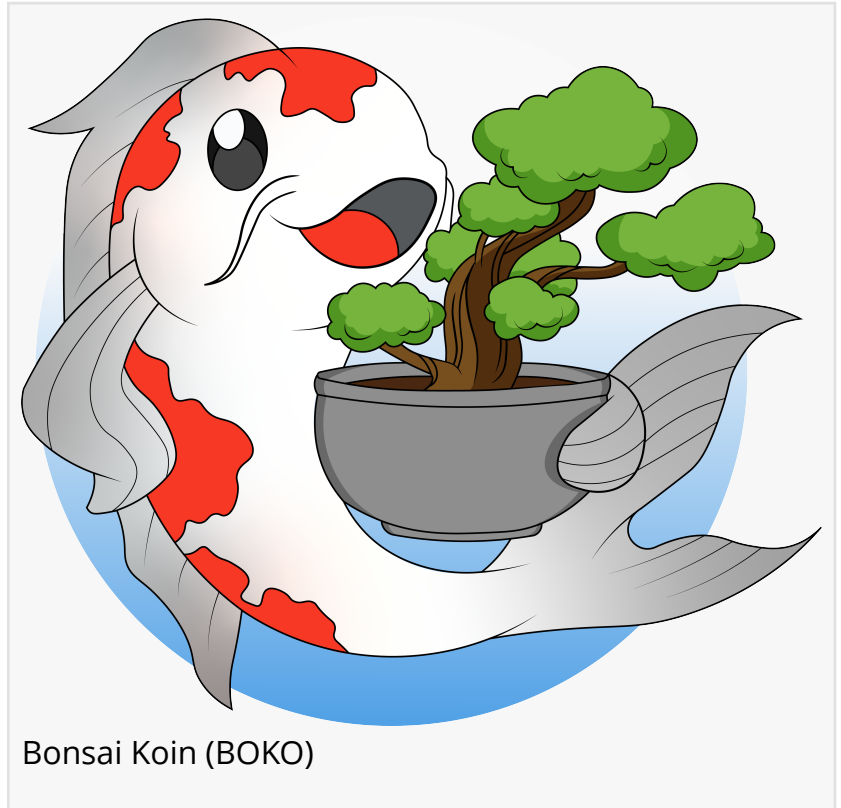

Founded by Mark Herbinko Jr., Bonsai Koin distinguishes itself in the cryptocurrency market through its partnership with Tree-Nation, enabling users to contribute to global tree-planting initiatives through platform engagement. The project, with a

current market capitalization above \$100,000, operates on the Binance Smart Chain (BNB network) to ensure efficient and cost-effective transactions.

The [BOKO Faucet](#) app, currently in beta testing for Android devices and soon to be available on the Google Play Store, allows users to earn free BOKO tokens while contributing to environmental initiatives. Each interaction with the faucet on the website directly supports tree-planting efforts through the company's partnership with Tree-Nation.

"At Bonsai Koin, we believe in merging cryptocurrency with substantial environmental impact. Partnering with Tree-Nation empowers our community to contribute to a healthier planet with every faucet use," said Mark Herbinko Jr., founder of Bonsai Koin.

Leading the technical development is Wasay Goraya, Tech Lead for Bonsai Koin, who oversees the platform's security protocols and technological infrastructure. The project implements

Bonsai Koin (BOKO)

monthly token burns to reduce total supply while maintaining community engagement.

Bonsai Koin's operational model reflects its commitment to community and sustainability, with Herbinko covering many operational costs personally. This approach positions the project as an opportunity for investors interested in supporting mission-driven cryptocurrency initiatives that prioritize ecological responsibility alongside financial innovation.

The company plans to expand its educational resources and develop additional features that highlight the convergence of blockchain technology and environmental ethics. Future initiatives include strategic partnerships and enhanced tree-planting efforts through continued collaboration with Tree-Nation.

About Bonsai Koin

Bonsai Koin (BOKO) is a cryptocurrency project operating on the Binance Smart Chain that integrates financial innovation with environmental sustainability. Founded by Mark Herbinko Jr. and led technically by Wasay Goraya, the project features the BOKO Faucet app for earning free tokens while contributing to global tree-planting initiatives through a partnership with Tree-Nation. With a market capitalization above \$100,000, Bonsai Koin emphasizes community involvement and ecological responsibility through monthly token burns and user engagement that directly supports reforestation efforts.
