The Business
Research Company

The Business Research Company

The market size for mobile blackboards has experienced a robust expansion in past years. The market is forecasted to increase from \$1.26 billion in 2024, reaching \$1.37 billion in 2025 at a compound annual growth rate (CAGR) of 9.2%. The augmented growth during the historic period

can be credited to a rise in the global number of schools, elevated literacy rates worldwide, ballooning urban populace, increased admissions in education establishments, and amplified emphasis on enhancing workforce skills.

The Business Research Company

The market size for mobile blackboards is predicted to witness substantial expansion in the coming years, reaching a value of \$1.93 billion by 2029 with a compound annual growth rate (CAGR) of 8.9%. This projected growth during the forecasted period is attributed to growing

temporary learning arrangements, increasing implementation of mobile teaching methodologies, more seasonal education camps, rising demand for adaptable seminar settings, and growing deployment of mobile infrastructure for professional training. Key trends for this period include the incorporation of touchless gesture control on interactive blackboards, voice assisted blackboard features, adoption of e-ink display technologies, real-time tracking of student performance through analytics integration, and the inclusion of game-based elements to boost student involvement.

What Are The Current Leading Growth Drivers For Mobile Blackboard Market?

As remote learning becomes more prevalent, it is anticipated to boost the mobile blackboard market's growth. This form of education, which typically takes place outside traditional classrooms via digital platforms and the internet, provides more flexibility for students and teachers, allowing them to engage from various locations. Digital technology accessibility contributes mainly to the rise of remote learning as it enables education independent of location, catering to the changing work-life demands. The mobile blackboard market is appreciating this trend as these platforms provide user-friendly access to course materials and encourage interaction between students and teachers from anywhere and at any time. According to Eurostat data from January 2024, online education and the use of related materials among EU users between the ages of 16 to 74 grew by 2 percentage points to 30% in 2023 from 28% in 2022, therefore spurring the mobile blackboard market. More educational spending is fuelling the mobile blackboard market's growth since greater investments are being made in modern teaching tools. This term refers to financial resources assigned by governments, institutions, or individuals to education-related costs such as infrastructure and salaries. The rise in educational spending comes from recognition of education as a catalyst for economic growth and societal advance, thereby leading to greater efforts to enhance the accessibility and quality of education. Such spending encourages the adoption of mobile blackboards by subsidising the acquisition of modern teaching tools that support interactive learning. As per the Census Bureau in April 2024, the average expenditure per student in US public elementary and secondary schools grew by 8.9% in FY 2022, amounting to \$15,633, which is driving the mobile blackboard industry.

Which Companies Are Currently Leading In The Mobile Blackboard Market?

Major players in the Mobile Blackboard Global Market Report 2025 include:

- Pragati Systems
- EverPretty Furniture Co. Ltd.
- Magiboards Limited
- New York Blackboard Inc.
- Naugra Export
- Candypop Industries
