

Electric Toothbrush Market 2025 Trends: Predicted to Grow at a CAGR of 8.1% from 2022 to 2031, Report

The electric toothbrush market was valued at \$3.07 billion in 2020, and is projected to reach \$6.54 billion by 2031, at a CAGR of 8.1% from 2022 to 2031.

WILMINGTON, DE, UNITED STATES, September 4, 2025 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, [Electric Toothbrush Market](#) by Bristle, Head Movement, and End User: Global Opportunity Analysis and Industry Forecast, 2017-2023, the global [electric toothbrush](#) market was

“

The global electric toothbrush market size was valued at \$3,070.8 million in 2020, and is projected to reach \$6,549.1 million by 2031, growing at a CAGR of 8.1% from 2022 to 2031.”

Allied Market Research

valued at \$2,200 million in 2016, and is projected to reach \$3,770 million by 2023, growing at a CAGR of 8.0% from 2017 to 2023. The adult electric toothbrush accounted for more than 76% of the global electric toothbrush market in 2016.

Electric toothbrush has witnessed increasing popularity in

the recent decade, due to rise in awareness towards oral hygiene among people and increase in oral complications across the world. Moreover, electric toothbrush helps in effective removal of plaque and calculus from the oral cavity as compared to the manual toothbrush, thereby reducing oral problems such as gum diseases and tooth decay. In addition, the use of soft bristles in electric toothbrush helps in fighting tooth sensitivity. FOREO created ISSA, a unique electric toothbrush made of non-irritating silicon bristles, which reduce the pain caused by brushing in sensitive areas of oral cavity.

On the basis of bristle, the global electric toothbrush market is divided into soft bristles and nanometer bristles. The soft bristles segment is a major contributor to global electric toothbrush market, and is anticipated to be the most lucrative segment during the forecast period, as it offers several oral benefits such as prevention of plaque formation & dental caries and is better suited for sensitive teeth.

Based on head movement, the market is classified into rotation/oscillation and sonic/side-to-

side. The sonic/side-to-side segment is expected to grow at the highest rate, due to effective cleaning of oral cavity as compared to rotation/oscillation head movement.

Depending on end user, the market is fragmented into adult and children. The adult segment is expected to dominate the market throughout the forecast period, as oral complications are more prevalent among the adults. According to the United States National Library of Medicine, around 80-90% of adolescents between 15 and 19 years of age are suffering from mild-to-moderate gingivitis globally, and there is a further rise up to 92-97% in adults aged between 35 and 44 years.
