

SMEC to Showcase Cutting-Edge Machine Tools and Automation at EMO Hannover 2025

SMEC Machine Tools, a global leader in CNC machine tools and automation solutions, announced that it will exhibit at EMO Hannover 2025 in Hannover, Germany.

HANNOVER, GERMANY, September 4, 2025 /EINPresswire.com/ -- SMEC Machine Tools, a global leader in CNC machine tools and automation solutions, announced today that it will exhibit at EMO Hannover 2025, the world's leading trade fair for production technology, taking place from September 22 - 26, 2025, in Hannover, Germany.

Known as the premier stage for innovations in metalworking, EMO Hannover draws exhibitors and visitors from over 40 countries. SMEC will use this global platform to highlight its latest advancements in automation, high-precision CNC technology, and integrated production solutions designed to help manufacturers boost productivity and efficiency.

What Will SMEC Present at EMO Hannover?

SMEC will feature several new and upgraded solutions designed to meet the growing needs of manufacturers worldwide:

Next-Generation CNC Machine Tools

SMEC will showcase its newest CNC lathes and machining centers, including the debut of a brand-new model designed to deliver precision, reliability, and speed.

Automation Solutions for Smarter Factories

From robotic handling systems to automated tool change technology, SMEC will showcase how automation can reduce downtime and optimize production lines.

Industry 4.0 Integration

SMEC will demonstrate innovative, connected systems that integrate seamlessly with digital production environments, helping companies embrace Industry 4.0 with ease.

Sustainable Manufacturing Practices

Energy-efficient designs and advanced retrofitting options will be on display, showing how SMEC supports cost savings and environmental responsibility.

[New Machine Launch at EMO Hannover](#)

A highlight of SMEC's participation will be the world premiere of its newest CNC machining center, designed for high-speed, high-precision applications. The new model combines advanced automation features with energy-efficient engineering, offering manufacturers a solution that cuts cycle times while improving accuracy.

Attendees will get the first look at the machine in action through live demonstrations at SMEC's booth. Experts will be available to walk visitors through features, explain integration options, and answer questions about how the new model can support different production environments.

Why EMO Hannover Matters for SMEC Customers

At EMO Hannover, SMEC looks forward to meeting manufacturers, distributors, and partners face to face. The show is a chance to see real progress in areas like automated workflows and sustainable manufacturing: fields where SMEC delivers practical solutions built around customer needs.

About EMO Hannover

Organized by the German Machine Tool Builders' Association (VDW), EMO Hannover is

recognized as the world's leading trade fair for production technology. The entire spectrum of metalworking technologies, from machine tools and precision equipment to digital systems and automation, is brought together at the show.

About SMEC Machine Tools

SMEC Machine Tools is a leading global provider of high-precision CNC machine tools and automation solutions. SMEC is dedicated to quality, innovation, and customer support, helping manufacturers in industries like automotive, aerospace, energy, and general manufacturing. Through SMEC America, the company offers hands-on sales and service across North and South America
