

Antireflective Coatings Market to Witness Promising Growth Opportunities by 2030

Vacuum deposition accounted for the largest share in 2020 (nearly two-fifths), thanks to low environmental impact and versatility.

WILMINGTON, DE, UNITED STATES, September 5, 2025 /EINPresswire.com/ -- According to the report, the global [antireflective coatings market](https://www.alliedmarketresearch.com/antireflective-coatings-market) was valued at \$4.3 billion in 2020 and is projected to reach \$8.9 billion by 2030, growing at a CAGR of 7.61% from 2021 to 2030.

Key Drivers:

- Rising demand from eyewear and photovoltaic industries is accelerating adoption.
- Growing use of antireflective glass in construction further boosts market growth.
- High costs and limited consumer awareness remain challenges.
- Advancements in durability and solar efficiency present significant opportunities.

Market Insights:-

By Application:

- Eyewear segment held the largest share in 2020 (over one-third), driven by rising demand for progressive lenses amid growing presbyopia cases.
- Automobile segment is forecasted to record the fastest growth (CAGR 8.76%) due to the need for glare reduction and improved visibility.

By Technology:

- Vacuum deposition accounted for the largest share in 2020 (nearly two-fifths), thanks to low environmental impact and versatility.
- Sputtering is expected to grow at the highest CAGR (8.04%) through 2030.

By Region:

- North America dominated the market in 2020 (over one-third share) supported by high demand in eyewear, consumer electronics, and displays.
- Asia-Pacific is anticipated to register the fastest growth (CAGR 8.27%), led by cost-effective manufacturing and strong presence of key players.

Leading Market Players:

- Essilor International
- E.I. du Pont de Nemours and Company
- Carl Zeiss AG
- Honeywell International
- Koninklijke DSM N.V.
- Hoya Corporation
- PPG Industries
- Optical Coatings Japan
- Viavi Solutions, Inc.
- Rodenstock GmbH
