

# DitchCarbon Named a Cool Vendor by Gartner for Supply Chain Sustainability

*Gartner recognises DitchCarbon's survey-free Scope 3 emissions platform as a key enabler of decarbonisation at scale*

LONDON, UNITED KINGDOM,  
September 11, 2025 /  
EINPresswire.com/ -- From Chaos to  
Confidence

Scope 3 has always been the hardest part of emissions management—fragmented, survey-heavy, and slow to act on.

We're proud to share that Gartner has named [DitchCarbon](#) a Cool Vendor in its 2025 report on Supply Chain Sustainability Digital Solutions.

This recognition comes from Gartner analysts:

- Kevin Lawrence
- Marta Muñoz Méndez-Villamil
- Miguel Cossio
- Federica Stufano

□

## Why Gartner Chose DitchCarbon

Kevin Lawrence the report's lead author and Director Analyst in the Talent and Sustainability team at Gartner said in the report that:

“DitchCarbon provides an AI-powered Scope 3 emissions data platform that enables companies to access supplier emissions data without sending supplier surveys.”

DitchCarbon provides an AI-powered Scope 3 emissions data platform that enables companies to access supplier emissions data without sending supplier surveys."

*Kevin Lawrence Director  
Analyst Talent and  
Sustainability team at Gartner*

"This allows buying organizations to have a more targeted discussion with individual suppliers on actions needed to decarbonize."

That's the shift we're enabling:

- Verified data
- Faster action
- Lower burden
- Real decarbonisation

This comes hot on the heels of DitchCarbon being the first scope 3 solution to be verified by UL Solutions, rounding off an excellent quarter for the AI powered team.

## What That Time Saves—and What It Enables

Marc Munier CEO at DitchCarbon said:

"Our platform beats generic ESG reporting tools by eliminating the need for tedious supplier surveys and freeing up valuable sustainability time for real decarbonisation, our clients are tired of big implementations that fail to deliver, DitchCarbon gets them to the important stuff much faster"

And once that admin load is gone, teams can finally:

- Prioritise high-impact supplier engagement
- Use scenario-tested forecasts to plan action
- Make procurement decisions aligned to emissions targets
- Report with confidence, not chaos

This is what Scope 3 was always meant to be: not just reporting, but reduction.
