

Consiliari launches Career Roadmap: an AI planning tool that turns career goals into step-by-step plans

Consiliari today announced Career Roadmap, an AI-powered planning module that converts a user's target role or outcome into a practical, measurable plan.

MIAMI, FL, UNITED STATES, September 5, 2025 /EINPresswire.com/ --

[Consiliari](#), the leading innovator in AI Coaching and performance and performance solutions, today unveiled its groundbreaking [Career Roadmap](#) platform, a sophisticated strategic planning tool that transforms abstract career aspirations into concrete, actionable pathways for professional success. This system leverages advanced artificial intelligence and comprehensive market analysis to create personalized career plans that adapt dynamically to changing circumstances and emerging opportunities.

Consiliari AI Career Roadmap

“

People don't need generic advice—they need a plan they can execute and measure”

Eryck Dzotsi

The Career Roadmap addresses a critical gap in professional development by providing the strategic framework that most career guidance lacks. While traditional career advice often focuses on immediate tactics or general principles, the Career Roadmap creates comprehensive, long-term strategies that connect current positions with desired destinations through clearly defined steps, milestones, and timelines.

“People don't need generic advice—they need a plan they can execute and measure,” said Eryck Dzotsi, Founder at Consiliari. “Career Roadmap makes the next three moves obvious and ties each move to the outcome you want.”

This launch represents a significant advancement in career planning technology, offering professionals the same level of strategic planning sophistication that has traditionally been available only through expensive executive coaching and consulting services. By democratizing access to advanced career strategy development, Consiliari is empowering professionals at all levels to take control of their career trajectories and achieve their most ambitious professional goals.

The Career Roadmap platform is built upon a sophisticated AI framework that combines strategic planning methodologies with machine learning algorithms trained on millions of successful career transitions and professional development patterns. This technological foundation enables the system to create highly personalized roadmaps that account for individual circumstances, market conditions, and industry-specific requirements.

Anchored to Consiliari [AI Coach](#)

Career Roadmap runs on Consiliari AI Coach, the company's most advanced coaching model to date. The engine blends multi-turn reasoning with a role-skill graph, real-time market retrieval, and scenario simulation to produce plans with clear "why this, why now" rationales. It maintains a longitudinal profile to personalize actions, scores momentum against the target role, and refines recommendations as users execute and conditions change.

Why it matters

Most career guidance is tactical and short-term. Career Roadmap focuses on strategy and execution: what to build, in what order, and how to know you're getting closer.

What Career Roadmap does

Role-anchored planning: Generates a path from current position to a defined target role or outcome.

Skill-gap & experience mapping: Identifies competencies to build and the projects or responsibilities that close those gaps.

Dynamic milestones: Near-term (30 days), quarterly, and annual checkpoints with clear success criteria.

Consiliari AI Logo

Scenario planning: Alternative routes with trade-offs for time, risk, and effort.

Market-aware updates: Adjusts guidance as demand for roles and skills changes.

"Traditional career planning often fails because it lacks the specificity and adaptability needed to navigate today's complex professional landscape," added Eryck Dzotsi. "Our Career Roadmap platform creates a strategic view that provides clear direction while remaining flexible enough to adapt to changing circumstances and emerging opportunities."

Who it's for

Ambitious professionals at an inflection point — aiming for a promotion, a pivot, or a rebound — and teams that want clearer development plans for talent.

How it works

Assess current skills, experience, constraints, and target role.

Generate a roadmap and choose the preferred path.

Execute weekly actions; track milestones; adjust as conditions change.

About Consiliari

Consiliari is a pioneering technology company dedicated to combining cutting-edge artificial intelligence with decades of career coaching expertise to help ambitious professionals navigate their careers with unprecedented clarity, strategy, and success.

In a world where career paths are increasingly complex and competitive, we believe every professional deserves access to world-class career guidance. That's why we've created the most advanced AI-powered career coaching platform — one that provides the strategic insights of a top-tier executive coach with the accessibility and intelligence that only artificial intelligence can deliver.
