Market Drivers: Digital Platforms, Smart Homes, and Convenience

Digital Transformation Reshaping Services

The rise of mobile-first platforms, AI-powered booking systems, and predictive maintenance tools is revolutionizing the repair ecosystem. By automating work requests and enabling seamless service-provider allocation, digital solutions are cutting delays, enhancing customer experience, and boosting efficiency across verticals.

Smart Homes and Connected Devices Fueling Demand

With global smart home adoption on the rise, consumers require timely and skilled repair solutions for appliances, HVAC systems, and connected devices. Remote diagnostics, predictive failure detection, and IoT-enabled service monitoring are setting new standards for proactive maintenance.

Growing Consumer Expectations for Convenience

Modern consumers prioritize speed, reliability, and trust in repair services. On-demand platforms not only provide same-day service but also enable transparent pricing and verified professional networks, strengthening consumer confidence.

Competitive Landscape

The on-demand repairs services industry is dominated by a mix of global tech-enabled service platforms and specialized regional providers. Key players are investing in AI-driven service allocation, remote diagnostics, and partnerships with OEMs to gain competitive advantage.

Prominent companies include:

Angi
Urban Company
HomeServe plc
Puls
Asurion Tech Repair & Solutions
Wrench
HelloTech
Onsitego
TaskRabbit
Geek Squad
Helping
YourMechanic
Urgent.ly

These providers are reshaping the service landscape by focusing on technology-driven innovation, faster turnaround times, and personalized service experiences.

Recent Developments

August 2025 – Samsung Expansion: Samsung expanded its Home Appliance Remote Management globally, enabling remote diagnostics, guided service, and faster repair scheduling across multiple markets. This initiative reduces downtime and improves first-time fix rates.

June 2025 – Angi Launches AI Helper: Angi introduced its “AI Helper”, an intake assistant that converts homeowner descriptions into precise, professional work requests. The innovation enhances match accuracy and significantly speeds up the booking process for repairs and maintenance.

These strategic developments highlight the growing role of AI, automation, and global connectivity in shaping the future of on-demand repair services.

Country-Wise Outlook

United States – Innovation in Home & Appliance Repairs

The U.S. remains a frontrunner due to its strong base of connected devices and smart home adoption. With leading platforms leveraging AI and remote diagnostics, the country is set to remain the largest market for on-demand repairs.

India – Rising Urbanization Boosts Growth

India’s expanding middle class and rising smart appliance ownership are creating strong demand for on-demand services. Platforms such as Urban Company are scaling nationwide, providing skilled technicians and standardized service quality.

Asia-Pacific – Mobility and Automotive Repairs

Countries like China and Japan are witnessing increased demand for automotive and mobility-related repair services. Platforms like Urgent.ly and YourMechanic are capitalizing on this trend by expanding their service networks.

Future Outlook: AI, Automation, and Sustainability

The on-demand repair services market is set to enter a new era where AI-powered diagnostics, predictive maintenance, and automated booking systems redefine customer experiences. Emerging trends include:

Remote Troubleshooting: Expanding use of AR/VR and video-based diagnostics.

Green Repairs: Eco-friendly spare parts and sustainable service models gaining traction.

Predictive Analytics: Leveraging IoT data to anticipate failures before they occur.

Seamless Ecosystems: Partnerships with OEMs for integrated repair and warranty services.

By 2035, on-demand repair services will not only enhance consumer convenience but also play a vital role in reducing electronic waste, improving sustainability, and extending the lifecycle of household and commercial assets.
