

EMBD Finance and Raze Announce Strategic Partnership and \$100M+ Tokenized Private Credit Vault

EMBD Finance today announced a strategic partnership with Raze Finance to launch a high-yield token designed for shorter-term investment lockups

CHEYENNE, WY, UNITED STATES, September 17, 2025 /EINPresswire.com/ -- EMBD Finance today

“

This partnership represents the next stage of our mission at EMBD Finance: to connect high-performing digital businesses in alternative markets with global capital”

Advait Nair

announced a strategic partnership with Raze Finance, the infrastructure powering real-world asset (RWA) tokenization, to deliver a next-generation RWA yield offering leveraging Raze’s Vault-as-a-Service platform. The collaboration will launch with a high-yield token designed for shorter-term investment preferences, making institutional-grade opportunities accessible to a broader range of investors.

A New Standard in Tokenized Yield

This partnership brings together two innovators reshaping

how capital flows into real-world assets:

EMBD Finance: A pioneer in embedded finance infrastructure connecting fast-growing FinTech innovators with crypto-native investors.

Raze Finance: The infrastructure tech stack powering tokenized real-world assets—private credit, private equity, real estate, and commodities, with built-in global regulatory compliance, investor onboarding, and smart contract automation and execution.

By combining EMBD Finance’s data-driven asset underwriting and monitoring with Raze’s compliant security token offering and issuance infrastructure, qualified investors will be able to participate in tokenized SPV vaults that offer exposure to real-world yields from embedded finance opportunities in the world’s fastest-growing markets.

Why This Matters

“Partnering with EMBD Finance allows us to bridge two critical pieces of the RWA puzzle: real-time, data-backed yield origination and seamless tokenized distribution,” said Brian Anderson,

CEO of Raze Finance. "This unique offering gives investors access to shorter-duration, high-yield tokens, a product category that combines the trust of embedded finance with the efficiency of blockchain."

"This partnership represents the next stage of our mission at EMBD Finance: to connect high-performing digital businesses in alternative markets with global capital," said Advait Nair, Head of Strategy and Investments at EMBD Finance. "With Raze Finance, we can now offer institutional-grade transparency and compliance through tokenized vaults, delivering real yield to investors while channeling capital to FinTech innovators serving untapped markets worldwide. We see this as the future of a more inclusive global financial system."

A \$100M+ Milestone

With more than \$100 million in assets moving on-chain through this collaboration, the Raze-EMBD Finance partnership represents one of the largest tokenized private credit initiatives to date, signaling the acceleration of institutional demand for compliant, yield-bearing RWAs. The offering is expected to be available in early Q4 2025, beginning with non-U.S. investors only. Interested investors can register for early access and launch details at <https://embd.finance/>.

About EMBD Finance

EMBD Finance is building the intelligence layer that connects real-world embedded finance assets to global digital liquidity pools. Leveraging advanced data aggregation, real-time risk monitoring, and automated collections, EMBD transforms high-yield, productive assets into tokenized investment products. By creating a direct digital bridge between innovators and investors, EMBD delivers stable, non-synthetic yield while making real-world finance transparent, accessible, and tradable on-chain.

About Raze Finance

Raze provides the infrastructure layer for tokenized real-world assets, offering an end-to-end platform for compliant issuance, distribution, and management of tokenized private credit, private equity, real estate, and commodities. With built-in regulatory compliance, investor onboarding, and smart contract automation, Raze enables institutions and asset originators to unlock value, scale distribution, and deliver real yield globally.
