

Advanced Aerial Mobility Market Size Expected to Reach \$110 Billion by 2035

Advanced aerial mobility market is expected to be valued at \$16.81 billion in 2025, and is projected to reach \$110 billion by 2035, registering a CAGR of 21.7%

WILMINGTON, DE, UNITED STATES, September 9, 2025 /EINPresswire.com/ -- By mode of operation, the piloted segment is projected to dominate the global market in 2025, in terms of revenue. However, the autonomous segment is expected to lead the market growth during the forecast period. On the basis of end-use, the cargo segment is anticipated to incur a higher share. By propulsion type, the electric segment is projected to dominate the global market in 2025, in terms of revenue. Europe is expected to be the highest revenue contributor in 2025, and is expected to emerge as a growth leader in the global market

Europe will be the highest revenue contributor by 2025, followed by North America, Asia-Pacific, and LAMEA. Europe is expected to maintain its lead during the forecast period, owing to presence of favorable advanced aerial mobility infrastructure and regulations, along with presence of prominent flying cars and cargo drones making companies in the region.
