

IGadgets and ouTask collaborate on promoting the OuTask TD2 - The All-in-One Lantern for Every Adventure

The OuTask TD2 is crafted from full-metal housing, giving it the durability to withstand harsh outdoor conditions.

GARDEN GROVE, CA, UNITED STATES, September 10, 2025 / EINPresswire.com/ -- [IGadgets](#) is pleased to announce its collaboration with [OuTask](#), the creator of the number 1 lighting tool on Kickstarter and Indiegogo; OuTask Telescopic Lantern. IGadgets has been engaged to help this original start-up market their improved version of the ouTask TD2: The All-in-One Lantern for Every Adventure.

ouTask TD2: The All-in-One Lantern for Every Adventure

When it comes to camping or outdoor adventures, most lanterns do one job: provide light. But the ouTask TD2 Telescopic Lantern isn't just a lantern— It's a flashlight, desk lamp, floodlight, emergency light, and tactical red light — all in one. Fully extendable, rotatable, and adjustable in brightness and color temperature to fit any situation.

Built for Every Adventure

The [OuTaskTD2](#) is crafted from full-metal housing, giving it the durability to withstand harsh outdoor conditions. Despite its ruggedness, it remains compact and portable, easily sliding into a backpack or even a large pocket. It's a tool built not just for convenience, but for survival.

Lighting without Limits

Unlike traditional lanterns, the OuTaskTD2 features a telescopic pole that extends to provide elevated, overhead lighting—ideal for illuminating a campsite. Its 720° omni-directional rotating head, extendable 360° rotating light pole, and dual-sided lighting ensure that no corner is left in the dark.

OuTask TD2 shines up to 1500 lumens with smooth dimming and stepless color temperature adjustment from warm 2000K to cool 7000K with high color accuracy (CRI 90), perfect for any moment—from campfires to focused tasks.

Hands-Free Versatility

The built-in tripod and magnetic base let you set up the OuTaskTD2 anywhere—on the ground, attached to a car, or mounted on metal equipment. Whether you're cooking at camp, repairing gear, or signalling for help, the OuTaskTD2 adapts instantly.

Power That Works for You

The OuTask TD2 doubles as a USB-C power bank, keeping your phone, GPS, or camera charged when you need it most. Its swappable 21700 battery system means you'll never run out of juice on long adventures—simply swap in a fresh cell and keep going.

Safety First

OuTask TD2 is the world's first dual-sided lighting design—one side can be used for car repair or illumination, while the other side can switch to a red & blue warning light. This makes it just as valuable in your car emergency kit as it is in your camping gear.

What makes the OuTask TD2 truly unique is its all-in-one design philosophy. Instead of carrying separate gear—a flashlight, lantern, tripod, floodlight, and power bank—you get everything in one compact, rugged package.

For adventurers, families, or anyone who values preparedness, the OuTaskTD2 isn't just another lantern—it's peace of mind.

About OuTask:

OuTask was born out of a reverence for nature and a pursuit of the adventurous spirit. They are dedicated to providing exceptional gear for outdoor enthusiasts worldwide, helping them push their limits as they explore the world.

OuTask products, with their unique designs, have become coveted treasures for adventurers and collectors alike. Each adventure is a unique journey, and OuTask product is an indispensable companion on that journey.
