

AGII App Launches Across iOS and Android to Deliver AI-Powered Web3 Tools

The official AGII mobile app brings decentralized intelligence to users worldwide with full access to smart contract tools and automation layers.

SINGAPORE, SINGAPORE , SINGAPORE,
September 10, 2025 /

EINPresswire.com/ -- [AGII](#) has officially launched its mobile app across iOS and Android platforms, bringing its AI-driven Web3 tools directly to users' fingertips. With this release, users can now build, test, and monitor smart contracts with AGII's decentralized intelligence stack—anytime, anywhere.

Your one-stop AI solutions platform!

The AGII app offers real-time automation engines, predictive risk assessment, and scalable smart contract deployment. Designed for both developers and enterprises, it serves as a mobile gateway to self-optimizing contracts, adaptive workflows, and low-latency execution across major blockchains.

Key features include modular automation tools, contract diagnostics, feedback loops, and multi-chain support. The app reflects AGII's commitment to universal Web3 access—removing barriers to decentralized innovation while maintaining enterprise-grade functionality and speed.

About AGII

AGII is a decentralized smart contract platform that infuses AI into every layer of Web3 infrastructure. From mobile to enterprise, AGII's self-evolving contracts and automation protocols unlock fast, secure, and intelligent dApp execution for developers worldwide.
