The Business
Research Company

The Business Research Company

The market cap for emergency general surgery services has seen robust growth in recent periods. The market is projected to expand from \$23.37 billion in 2024 to \$25.04 billion in 2025, with a compound annual growth rate (CAGR) of 7.1%. Past growth patterns can be linked to

numerous factors such as an increasing number of elderlies needing immediate medical attention, an uptick in appendicitis and hernias cases, augmented urban population concentration, enhanced consciousness about healthcare, and increased public health funding from the government.

Expectations are high for the emergency general surgery services market to experience robust growth in the coming years. By 2029, it is projected to expand to \$32.52 billion, with a compound yearly growth rate (CAGR) of 6.8%. The

propelling factors for this growth during the forecast period include a rise in road accident trauma, an escalating load of chronic diseases triggering severe complications, heightened demand for 24/7 surgical aid, an increase in medical tourism for emergency procedures, and improved education and simulation for emergency surgeons. Key trends to watch in the forecast period consist of the utilization of artificial intelligence in triage and diagnostics, adoption of robot-aided emergency surgeries, the blending of telemedicine into surgical consultations, the introduction of mobile surgical units, and advancements in less invasive surgical tools.

What Are The Driving Factors Impacting The Emergency General Surgery Services Market?

An upsurge in road traffic accidents is set to fuel the expansion of the emergency general surgery services market. Essentially, road traffic accidents are unforeseen incidents on public roads involving vehicles, pedestrians, or any other road user, resulting in injuries, deaths, or property damage. The growth in these accidents can be attributed to the increasing usage of mobile phones whilst on the wheel, creating distractions for drivers, and hindering their prompt response to road situations. Emergency general surgery services are pivotal in these accidents as they provide immediate surgical intervention, significantly managing life-threatening internal injuries and increasing the survival rates of the affected individuals. For example, the Australian Government, a government agency based in Australia, stated in May 2023 that there was a 5.8% increase in road crash fatalities in 2022, totaling 1,194. Consequently, the escalating frequency of road traffic accidents is propelling the expansion of the emergency general surgery services market.

Which Players Dominate The Emergency General Surgery Services Industry Landscape?

Major players in the Emergency General Surgery Services Global Market Report 2025 include:

- Kaiser Foundation Health Plan Inc.
- HCA Healthcare
- Providence Health Services
- Ascension
- Tenet Healthcare Corporation
- Sutter Health
- Banner Health
- Universal Health Services
- Community Health Systems Inc.
- NewYork Presbyterian Hospital

What Are The Key Trends Shaping [The Emergency General Surgery Services Industry?](#)

Major players in the emergency general surgery services market are turning their attention towards the creation of innovative solutions such as surgical quality programs. These are aimed at augmenting patient outcomes, standardizing the provision of care, and boosting hospital performance via data-driven decisions and confirmation protocols. Surgical quality programs are organizations structured to monitor, evaluate, and improve the quality of surgical care by implementing standards based on evidence, measuring performance, and ongoing upgradation processes throughout health care facilities. For example, in December 2022, the American Association for the Surgery of Trauma (AAST), a non-profit professional medical association based in the US, introduced the Emergency General Surgery Verification Program (EGS-VP). This is a fresh surgical quality program designed to set and enhance the standard of care for patients requiring emergency general surgery. The program sets up standards based on evidence, evaluates hospital performance, and offers structured guidance meant for quality improvement.

It allows facilities to measure their emergency surgical services against others, identify gaps in care, and apply targeted improvements. In the final analysis, EGS-VP aids hospitals in improving patient outcomes, decreasing variability in care, and boosting the overall readiness of the surgical system.

Global Emergency General Surgery Services Market Segmentation By Type, Application, And Region

The emergency general surgery services market covered in this report is segmented

- 1) By Procedure: Abdominal Surgery, Trauma Surgery, Vascular Surgery, Thoracic Surgery, Emergency Orthopedic Surgery, Other Procedures
- 2) By Patient Type: Adult, Pediatric, Geriatric
- 3) By End User: Hospitals, Specialty Clinics, Ambulatory Surgery Centers (ASCs), Other End-Users

Subsegments:

- 1) By Abdominal Surgery: Appendectomy, Cholecystectomy, Bowel Resection, Hernia Repair, Exploratory Laparotomy
- 2) By Trauma Surgery: Blunt Trauma Repair, Penetrating Injury Management, Head And Neck Trauma Surgery, Abdominal Trauma Surgery, Musculoskeletal Trauma Surgery
- 3) By Vascular Surgery: Emergency Bypass Surgery, Aneurysm Repair, Arterial Embolization, Vascular Trauma Management, Thrombectomy
- 4) By Thoracic Surgery: Emergency Thoracotomy, Lung Resection, Management Of Hemothorax Or Pneumothorax, Esophageal Injury Repair, Mediastinal Exploration
- 5) By Emergency Orthopedic Surgery: Fracture Fixation, Joint Dislocation Management, Emergency Spine Surgery, Compartment Syndrome Decompression, Open Reduction And Internal Fixation (ORIF)
- 6) By Other Procedures: Emergency Neurosurgery, Obstetric Emergencies, Urologic Emergency Surgery, Ear, Nose, And Throat Emergency Procedures, Burn Debridement Surgery
