

Connectivity Center Expands Its Security Solutions with New Product Launch

Connectivity Center introduces the Smart Keeper series of port blockers and locks, delivering stronger protection for hardware and sensitive data.

The Connectivity Center

ALVIN, TX, UNITED STATES, September 10, 2025 /EINPresswire.com/ --

September 10, 2025: Connectivity Center, known for its expertise in connectivity and cybersecurity, has launched a new line of physical security solutions designed to provide robust protection for hardware and data against unauthorized access. This new product lineup includes

the innovative Smart Keeper port blockers and [locks](#), offering robust protection against cyber threats targeting physical connections.

“

The launch of our Smart Keeper series reflects our commitment to staying ahead of evolving security threats by protecting not just networks, but the physical access points that often go overlooked.”

The Connectivity Center

As digital security concerns grow, the Connectivity Center has taken a proactive approach by addressing the vulnerability found in physical ports across devices. The Smart Keeper series offers solutions for protecting USB, [HDMI](#), [RJ45](#), and other crucial ports, ensuring that sensitive data remains protected in both commercial and educational settings.

The development of this product is consistent with Connectivity Center's continuous commitment to offering reliable and scalable security solutions for a wide range of industries, including government organizations, corporations, and educational institutions. With a track record of producing high-quality and tested solutions, the company is establishing itself as a significant player in the physical cybersecurity space.

The Smart Keeper series represents the latest in a line of protective tools designed to secure vital hardware components from potential threats. These products are now available for order, with extended warranty options that reflect the company's commitment to long-term customer satisfaction.

About Connectivity Center: Connectivity Center is a provider of high-quality cybersecurity and

connectivity products. Established in 2002, the company offers innovative solutions designed to secure both physical and digital assets across various industries. Its various product portfolio includes networking tools, data security devices, and other critical hardware that help protect critical infrastructure from evolving threats.
