

Beverly Wilshire Aesthetics Introduces Exosome Therapy: Regeneration, Reinvented

BEVERLY HILLS, CA, UNITED STATES, September 15, 2025 /EINPresswire.com/ -- [Beverly Wilshire Aesthetics](#), founded by [Dr. Behnoush Zarrini](#), is taking regenerative aesthetics to the next level with the arrival of [Exosome Therapy](#), a breakthrough treatment that awakens the skin's own power to restore, repair, and renew.

At the helm is Dr. Behnoush Zarrini, a board-certified physician with more than two decades of experience in precision aesthetics, regenerative medicine, and patient-centered care. His vision has always been clear: to move beyond surface treatments and create results that feel as transformative as they look.

"Exosome Therapy is not just another procedure," said Dr. Zarrini. "It is the future of regenerative aesthetics, where science and artistry come together to unlock the body's own potential for lasting radiance. My goal is to help patients experience not only visible change but a true renewal of confidence and vitality."

Exosome therapy represents one of the most exciting frontiers in modern aesthetics. These microscopic, cell-derived messengers carry powerful growth factors and regenerative signals deep into the skin, accelerating repair, boosting collagen production, and restoring natural vitality. At Beverly Wilshire Aesthetics, the treatment addresses a wide range of concerns including fine lines, skin laxity, hair restoration, scar revision, and post-procedure healing with remarkable precision and minimal downtime.

“

My goal is to help patients experience not only visible change but a true renewal of confidence and vitality.”

Beverly Wilshire Aesthetics

This evolution is mirrored in BWA's devotion to the client experience. "Every journey at BWA is

sacred,” said Tyler Cox, Director of Experience. “Exosome Therapy embodies our pursuit of what we call skin supremacy, a ritual of transformation where results go beyond the ordinary and the experience itself leaves clients feeling elevated, unforgettable, and radiant.”

With a portfolio that includes Morpheus8, HydraFacial, Lumecca IPL, injectable artistry, and microneedling, Beverly Wilshire Aesthetics continues to redefine the future of luxury medical aesthetics, now crowned with the power of Exosome Therapy.

About Beverly Wilshire Aesthetics

Beverly Wilshire Aesthetics is a premier destination for advanced aesthetic medicine in the heart of Beverly Hills.

Led by Dr. Behnoush Zarrini, the practice blends science, precision, and luxury to deliver results that transcend expectations. From regenerative treatments like Exosome Therapy to industry-leading technologies including Morpheus8 and Lumecca IPL, every treatment plan is curated with an unwavering commitment to safety, comfort, and transformative results. By uniting cutting-edge science with an elevated patient experience, Beverly Wilshire Aesthetics is shaping the future of nonsurgical rejuvenation and setting a new global standard for beauty and skin health.
