

New Maintenance Program Enhances Reliability of Whole House Water Filtration Systems

Aquacubed introduces a service program with lifetime maintenance, annual testing, and NAC technology to ensure clean, safe water for Los Angeles homes.

SAN DIMAS, CA, UNITED STATES,

September 12, 2025 /EINPresswire.com/ -- A new initiative has been introduced to support homeowners in maximizing the performance and longevity of their water filtration systems. The program includes lifetime servicing, annual water testing, and unlimited service calls, ensuring households can consistently enjoy safe, clean water.

“

"We ensure water systems perform at their best so families can enjoy cleaner, healthier water," said Oscar Espinoza, CEO of Aquacubed."

Oscar Espinoza

Regular inspections are scheduled each year to maintain peak system efficiency and to monitor water quality. Technicians conduct comprehensive assessments to identify potential issues early, helping families maintain confidence in their drinking water supply.

The service plan also extends beyond maintenance. Homeowners with a [whole house water filtration system in](#)

[Los Angeles](#) receive support for troubleshooting, technical guidance, and product optimization. This approach allows families to benefit from reliable service while reducing downtime or disruptions in access to filtered water.

The initiative highlights more than just water quality. With advanced Nucleation Assisted Crystallization (NAC) technology, systems help prevent calcium scale buildup, extending the lifespan of appliances and plumbing. Users also report noticeable improvements in skin and hair health due to the removal of chlorine and other contaminants.

This development underscores the growing emphasis on water safety and household wellness. By integrating professional maintenance with advanced technology, the program delivers lasting value for homes seeking efficient and sustainable water treatment solutions.

About [Aquacubed](#):

Aquacubed is committed to providing innovative residential water treatment solutions. With more than two decades of combined experience, the company focuses on delivering systems that improve lives while setting a high standard for customer care and sustainable practices.
