

Sacral Nerve Stimulation – Leading Expert Dr. Allen Kamrava Offers Access to Advanced Bowel Control Treatments

Dr. Allen Kamrava helps patients regain control and improve quality of life through advanced therapies for bowel dysfunction at Stool Control MD.

LOS ANGELES, CA, UNITED STATES, September 30, 2025 / EINPresswire.com/ -- Board-certified colorectal surgeon and leading expert in [sacral nerve stimulation \(SNS\)](#), Dr. Allen Kamrava, offers new highlights and information about his pioneering work in helping patients regain control and improve quality of life through advanced therapies for bowel dysfunction at Stool Control MD.

Stool Control MD

[Sacral Nerve Stimulation \(SNS\)](#) is a cutting-edge treatment designed to restore normal bowel function for patients struggling with conditions such as fecal incontinence and chronic constipation. By using a small, implanted device to stimulate the sacral nerves, SNS helps regulate communication between the brain and the bowel, leading to improved stool control and restored confidence in daily life.

“

With sacral nerve stimulation, we are able to offer a life-changing solution that is both minimally invasive and highly effective for individuals who may have struggled for years with bowel control.”

Dr. Allen Kamrava

“As a physician, one of the most rewarding aspects of my practice is giving patients their dignity back,” said Dr. Allen Kamrava. “With sacral nerve stimulation, we are able to offer a life-changing solution that is both minimally invasive and highly effective for individuals who may have struggled for years with bowel control issues. The goal is always to restore freedom, independence, and quality of life.”

Dr. Kamrava is among the nation's foremost specialists in this treatment, offering patients the latest advancements in Sacral Nerve Stimulation (SNS) with a patient-first approach. At Stool Control MD, every treatment plan is customized, ensuring patients receive comprehensive care tailored to their individual condition and lifestyle.

Patients who may be candidates for SNS include those with:

- Fecal incontinence unresponsive to traditional therapies
- Chronic constipation resistant to standard treatments
- Neurological or structural conditions affecting bowel control

With a focus on innovation, education, and compassionate care, Dr. Kamrava continues to set the standard for sacral nerve stimulation expertise in Los Angeles and beyond. For more information about Sacral Nerve Stimulation (SNS) or to learn more, contact Dr. Allen Kamrava at www.stoolcontrolmd.com or call (424) 222-9962.
