What Are The Key Factors Driving Growth In The Restaurant Buildings Market?

The growth of the restaurant buildings market is anticipated to be driven by the escalating demand for restaurants. The consistent expansion of this market is largely due to the rising preferences for family food festivities, convenience foods, prepared meals, and deli meats. The busy lifestyle of millennials and the worldwide growth of active workforce have impacted restaurant food consumption patterns, which is expected to contribute to the global growth of the restaurant building industry. A case in point is a report from the Office for National Statistics, a UK-based executive office of the statistics authority, stating that the total number of restaurants in the UK in 2022 was 101,785, a considerable increase from 95,060 in 2021. Consequently, the growth of the restaurant buildings market is fueled by the surging demand for restaurants.

What Are The Top Players Operating In The Restaurant Buildings Market?

Major players in the Restaurant Buildings include:

- DESCCO Design & Construction Inc.
- Stovall Construction Inc.
- Tech 24 Construction Inc.
- Hilbers Inc.
- Hencken & Gaines Inc.
- RCA Contractors Inc.
- Shingobee Builders Inc.
- The Beam Team Inc.
- GCM Construction Inc.
- Prodigy Construction Company.

What Are The Top Trends In The Restaurant Buildings Industry?

The restaurant buildings market is increasingly witnessing new product innovations as a key trend embraced by prominent companies operating within the sector. These corporations are focusing on the creation of advanced and cutting-edge technologies in building construction to consolidate their market position. For instance, in October 2022, Australia-based commercial building and construction enterprise, Luyten 3D – known for their 3D printing capabilities in building construction, launched the Platypus X12 concrete printer. This AI-driven mobile concrete 3D printer, designed particularly for the commercial building and construction domain, is one among the largest printers globally. It can be effortlessly converted into a 12x6 mobile crane within 20 minutes to print large-scale structures. The printer uses optical and sound-based artificial intelligence for data-driven concrete printing.
