*The Business Research Company*

escalating aesthetics industry, developments in injection methods, the impact and endorsements by celebrities, an emphasis on anti-aging treatments, and a surge in minimally invasive procedures.

The market size for dermaL fillers is projected to experience swift expansion in the coming years, with an estimated valuation of \$10.97 billion by 2029, and a Compound Annual Growth Rate (CAGR) of 11.1%. The anticipated growth during this forecast period can be ascribed to the widening of market avenues in developing economies, as well as the surge in demand for

customizable and personalized treatments, fillers that are both bioresorbable and biodegradable, and products focusing on durability and longevity. Key trends predicted for this forecast period involve the rise of biodegradable fillers, enhanced formulations, non-invasive procedures, customizable treatments, and products that yield enduring results.

What Are The Current Leading Growth Drivers For DermaL Filler Market?

The dermal filler market is expected to grow as there is an increase in the number of aesthetic procedures done by plastic surgeons. Aesthetic procedures, which enhance the appearance of the body and face, are becoming more popular due to an increased focus on beauty and physical appearance as a form of self-expression and identity. Dermal fillers, primarily used in plastic surgery or aesthetic procedures, contribute to a fuller, smoother look on the face. As an example, a report by the US-based professional organization, Aesthetic Society, in June 2024 stated that the number of breast implant removal procedures jumped to 74,326 in 2023 from 65,076 in 2022, a surge of 14.2%. Thus, the growth of the dermal filler market is directly related to the increasing number of aesthetic procedures conducted by plastic surgeons.

Which Companies Are Currently Leading In The Dermal Filler Market?

Major players in the Dermal Filler include:

- Merz Pharma GmbH & Co. KGaA
- Laboratoires Vivacy
- Bloomage Biotechnology Corporation Limited
- Teoxane Laboratories
- Sinclair Pharma
- Anika Therapeutics Inc.
- Croma-Pharma GmbH
- Revance Therapeutics Inc.
- BioPlus Co. Ltd.
- Hans Biomed Corp.

What Are The Main Trends, Positively Impacting The Growth Of Dermal Filler Market?

Leading firms in the dermal filler industry are concentrating on producing innovative formulas such as undereye hyaluronic acid (HA) dermal filler to stimulate market expansion. These fillers are injected beneath the eyes and are specifically created to replenish volume, diminish hollowness, and lessen the appearance of dark circles by using hyaluronic acid to boost hydration and create a more natural look. In a particular case, Galderma, a dermatological firm from Switzerland, launched Restylane Eyelight, the first and only HA dermal filler in the U.S. that uses NASHA technology in June 2023. With results that may persist for up to 18 months, Restylane Eyelight provides minimum crosslinking and a gel texture that is resistant to water absorption, promoting a natural-looking improvement. Supported by a Phase 3 clinical study, it revealed that 87% of patients noticed a decrease in undereye hollowness after three months, with high satisfaction levels sustained over the course of a year.

How Is The Dermal Filler Market Segmented?

The dermal filler market covered in this report is segmented –

- 1) By Filler Type: Calcium Hydroxylapatite, Hyaluronic Acid, Poly-Alkylimide, Polylactic Acid, Polymethylmethacrylate Microspheres
- 2) By Product: Biodegradable, Non-Biodegradable

3) By Application: Scar Treatment, Wrinkle Correction Treatment, Lip Enhancement, Restoration Of Volume Or Fullness

4) By End-User: Hospital, Cosmetic Clinics, Outpatient Centers, Beauty Centers, Other End Users

Subsegments:

1) By Calcium Hydroxylapatite: Injectable Gels, Micro-spheres

2) By Hyaluronic Acid: Cross-linked Hyaluronic Acid, Non-cross-linked Hyaluronic Acid

3) By Poly-Alkylimide: Injectable Gels, Implantable Fillers

4) By Polylactic Acid: Injectable Solutions, Biodegradable Fillers

5) By Polymethylmethacrylate (PMMA) Microspheres: Injectable Suspensions, Semi-permanent Fillers
