

R2 Recycling – NY Announces Solar Panel Recycling Services for NYC Businesses

R2 Recycling - NY offers compliant solar panel recycling services for all businesses and organizations throughout NYC

NEW YORK, NY, UNITED STATES,
September 15, 2025 /

EINPresswire.com/ -- R2 Recycling – NY today announced the expansion of its commercial recycling portfolio to include solar panel recycling services across New York State. The program is designed for businesses, schools, municipalities, utilities, property managers, EPCs, and O&M providers seeking a compliant, scalable solution for end-of-life and damaged photovoltaic equipment.

R2 Recycling - NY

As New York’s solar capacity continues to grow, a parallel need is emerging: responsible retirement of aging or storm-damaged equipment and the safe handling of project change-outs. Improper disposal of solar panels can increase environmental risk, expose organizations to avoidable costs, and undermine sustainability commitments. R2 Recycling – NY’s statewide offering closes that gap with a professional, logistics-first approach tailored to the realities of rooftop, carport, and ground-mount projects—without disrupting active operations.

“New York has invested heavily in renewable energy, and the next wave of leadership is about responsible end-of-life management,” said a spokesperson at R2 Recycling – NY. “Our solar panel recycling service gives customers a clear path to remove, transport, and recycle out-of-service equipment with confidence. They get a single point of contact, transparent documentation, and reliable timelines from start to finish.”

Statewide coverage with commercial-grade support

R2 Recycling – NY serves all five boroughs, Long Island, Westchester, the Hudson Valley, Capital Region, Central New York, Southern Tier, Finger Lakes, Western New York, and the North

Country. The company coordinates site-safe removal and transportation of solar panels and related balance-of-system equipment, aligning schedules with building operations, tenant needs, and contractor timelines. Whether a facility is retiring a small rooftop array or refreshing large multi-site portfolios, customers receive consistent support built around their scope and schedule.

Key elements of the service include:

Project-aligned logistics: Scheduling that fits crane days, roof access windows, and site safety protocols.

Documentation customers can use: Work orders, material summaries, and recycling confirmations to support internal reporting and sustainability goals.

Portfolio flexibility: Single-site pickups or multi-location rollouts coordinated through one team.

Compliance-focused handling: A service model built for organizational policies and environmental responsibilities.

“We’re often called in when timelines are tight or sites are complex,” added the spokesperson. “Our team’s experience with electronics, IT assets, and other regulated equipment translates directly to solar projects. Customers value that we already understand hassle-free service, safety coordination, and the importance of clean site turnover.”

Built for sustainability and operational clarity

Organizations across New York are raising the bar on sustainability, ESG, and waste-reduction initiatives. R2 Recycling – NY’s solar offering supports those commitments by providing a documented pathway for responsible disposition. Customers benefit from a repeatable process that scales with expansions, warranty replacements, insurance-driven change-outs, or planned decommissioning at the end of an asset’s service life.

Who benefits

Commercial property owners & managers upgrading or decommissioning rooftop arrays

EPCs and O&M providers coordinating panel replacements across multiple sites

Municipalities and school districts modernizing facilities or responding to weather-related damage

Manufacturers and warranty teams seeking a reliable recycling partner for product returns

Utilities and developers retiring or refreshing project assets

Getting started

R2 Recycling – NY offers fast quoting, flexible pickup windows, and a dedicated coordinator for multi-site projects. Customers will receive a tailored plan that aligns with building access requirements and safety protocols.

About R2 Recycling – NY

R2 Recycling - NY
310 Lenox Ave Suite 300
New York, NY 10027
(603) 224-7959

R2 Recycling – NY is a commercial electronics recycling provider serving businesses, schools, and government agencies throughout New York State. The company specializes in compliant removal, transportation, and recycling of technology and related equipment, helping organizations reduce risk, reclaim space, and advance sustainability goals.
