Excellence in Franchising

This year's winners reflect a franchise sector that is evolving in thoughtful and purposeful ways.

From healthcare services offering accessible community foot care to scalable fitness models built on inclusive education, the award recipients have demonstrated business models with real-world impact.

Many of the recognised organisations have developed distinct approaches to franchising. Some have built flexible models that reduce traditional barriers to entry, offering franchisees greater autonomy and fairer financial terms. Others have successfully scaled their operations while maintaining consistent training, brand integrity and local relevance. Notably, a number of winners have focused on sectors where innovation has historically been limited, delivering new standards in customer service, training and accessibility.

Across all categories, this year's winners and finalists have prioritised long-term value over short-term gains, enabling sustainable growth, improving access to services and supporting franchisees through well-defined systems and ongoing mentorship. Business Awards UK applauds all participants for their contributions to a stronger and more inclusive franchising landscape.
