

Calsoft & SmartHub.ai Announce Live Discussion: AI for OT Resilience: Smarter Detection, Stronger Compliance, Proven ROI

Calsoft and SmartHub.ai host a live panel on Sept 24, 2025, showcasing AI-driven OT resilience, smarter detection, stronger compliance, and proven ROI.

BANGALORE, INDIA, September 16, 2025 /EINPresswire.com/ -- In an era where operational technology (OT) environments are increasingly vulnerable to cyber threats, compliance burdens, and rising downtime costs, SmartHub.ai and Calsoft have partnered to address these pain points with an integrated, intelligent edge solution.

Their combined strengths now offer enterprises a fast-track to visibility, automation, and resilience across diverse OT infrastructures.

“

The future of OT resilience lies in uniting legacy and modern systems with AI-driven visibility, automation, and security—delivering compliance, uptime, and ROI.”

Somenath Nag, Sr. Vice President, Calsoft Inc.

And OT infrastructure is that which manages critical IT labs, datacentres, factory floor equipment, physical security infrastructure and facilities / IT deployment in large campuses/buildings.

According to industry reports, over 70% of OT environments lack real-time visibility. As digital transformation pushes deeper into energy, manufacturing, telecom, and healthcare sectors, the risks of ransomware, compliance violations, and unplanned operational downtime continue to escalate. The cost of inaction is no longer theoretical—it's measurable in lost revenue, regulatory penalties, and reputational damage.

According to industry reports, over 70% of OT environments lack real-time visibility. As digital transformation pushes deeper into energy, manufacturing, telecom, and healthcare sectors, the risks of ransomware, compliance violations, and unplanned operational downtime continue to escalate. The cost of inaction is no longer theoretical—it's measurable in lost revenue, regulatory penalties, and reputational damage.

Unified Edge Endpoint Management (UEM) platform brings full-stack visibility, real-time monitoring, robust security, and intelligent automation to heterogeneous OT ecosystems. UEM platform simplifies the management of diverse edge assets—regardless of device type, operating system, or communication protocol.

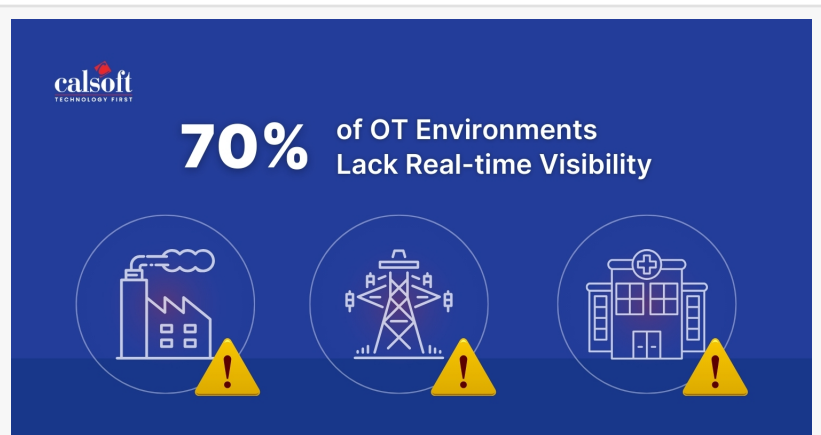

From industrial sensors and controllers to edge gateways and smart devices, the platform unifies operations under one centralized pane of glass. It empowers operations and IT teams to detect anomalies, enforce security policies, and orchestrate updates seamlessly—at scale.

Accelerating Value for Enterprises

SmartHub.ai partnership is already delivering results in sectors such as energy, critical infrastructure, telecom, and industrial manufacturing with their award-winning UEM platform.

By integrating SmartHub.ai's powerful SDKs and AI-driven automation with Calsoft's deep engineering capabilities—the joint solution delivers:

- Predictive Maintenance and Self-Healing OT Systems
- Cross-vendor, Legacy-to-Modern Device Management
- Real-time Threat Detection and Compliance Automation

This section is titled "Leadership Voices" in a blue banner. It features two circular headshots. On the left is Somenath Nag, Sr. Vice President, with the Calsoft logo below his name. On the right is Niranjana Maka, CEO & Co-founder, with the SmartHub.ai logo below her name. The background is a dark blue gradient with a network of white dots and lines.

This section provides details for a "Live Discussion" titled "AI for OT Resilience: Smarter Detection, Stronger Compliance, Proven ROI". The date is September 24, 2025, from 11:00 AM PDT to 2:00 PM EDT (11:30 PM IST). A "Register Now" button is present. The panelists are divided into two groups: "Guest Panelist" (Rohit Sarkar, Angela Weinman, Rehan Reddy) and "Host Panelist" (Somenath Nag, Niranjana Maka). Each panelist has a circular headshot and their name and title listed below. The Calsoft logo is in the top left corner.

- Fast ROI with SaaS-style Deployment Models

To explore these industry challenges and solutions, and discover real benefits for your business, experts from Calsoft and SmartHub.ai are hosting an exclusive live discussion, [OT Security & Compliance: Accelerating Digital Transformation with AI](#), with industry leaders across Security, Operations, and Compliance, on September 24, 2025. [Register here](#) to reserve your spot.

“One of our customers in social media industry achieved 99.7% uptime and an MTTR of just 8.63 hours, enabled by enhanced visibility and rapid issue resolution. At a global professional networking company, a single engineer now manages over 2,700 devices worldwide using our platform. We deliver faster deployment, deeper operational insight, and resilient performance—driving stronger ROI across the board.”

— [John Doe](#), [VP of Engineering](#) & [Operations](#), [ABC Corp.](#)

“At Calsoft, we recognize that the future of [enterprise OT infrastructure](#) hinges on intelligent visibility, seamless automation, and uncompromising security. Our partnership with SmartHub.ai empowers organizations to bridge legacy and modern edge environments, delivering unified endpoint management that accelerates digital transformation and protects critical assets. By harnessing advanced AI and deep engineering expertise, we help customers realize tangible operational gains — from predictive maintenance and rapid issue resolution to continuous compliance and scalable deployment. Together, we’re redefining how enterprises manage risk, drive resilience, and unlock the full value of their OT investments.” Comments [by John Doe](#), [VP of Engineering](#), [ABC Corp.](#)

The live discussion will highlight real-world OT security and compliance challenges, with insights from experts on how AI-powered solutions reduce downtime, accelerate compliance, and deliver measurable ROI across industries.

Calsoft is a leading technology-first partner providing digital and product engineering services specializing in AI-driven data solutions, cloud-native architectures, and next-generation application modernization. For nearly 3 decades, with deep expertise in AI, ML, data engineering, and intelligent automation, Calsoft enables enterprises and ISVs to accelerate innovation, optimize performance, and scale seamlessly. Our solution accelerators and frameworks augment go-to-market plans and expedite product launches to meet customers.

[Contact us](#)

SmartHub.ai specializes in AI-ML powered Edge automation, OT asset management, Edge Intelligence and Cybersecurity Hygiene for operational teams with IoT devices and edge infrastructure. We help companies achieve zero downtime, higher productivity, better operational efficiency, continuous compliance, and effective risk management of their Edge Infrastructure.
