

Astria Learning and Makerere University explore eCampus partnership to drive digital transformation

KAMPALA, UGANDA, September 16, 2025 /EINPresswire.com/ -- Astria Learning, a global leader in digital education solutions, has initiated discussions with Makerere University, one of Africa's most prestigious institutions, to establish a state-of-the-art AI-powered eCampus that will transform higher education delivery across the continent.

The inaugural meeting, held this week in Kampala, brought together Makerere University officials and Astria Learning representatives to outline a shared vision for a digital-first future in higher education.

The proposed eCampus will:

- Expand access to Makerere's academic excellence for students globally
- Offer flexible, technology-driven learning experiences
- Provide students with 24/7 access to a wealth of digital resources
- Integrate AI-powered programmes and innovative learning tools to prepare graduates for the future of work

With proven expertise in Learning Management System (LMS) implementation, online infrastructure, and course design, Astria Learning is well-positioned to support Makerere University in achieving its digital transformation goals. Through its flagship solutions, including the Astria eCampus platform, Astria Digital Library (ADL), and customised virtual learning environments, Astria Learning empowers universities to deliver flexible, scalable, and high-quality education that meets the needs of today's learners.
