Hoyack Achieves SOC 2® Certification, Demonstrating Commitment to Security, Trust, and Innovation

SAN ANTONIO, TX, UNITED STATES, September 16, 2025 /EINPresswire.com/ -- Hoyack, a San Antonio–based technology company specializing in AI software development, enterprise solutions, and instant team expansion, today announced it has successfully achieved SOC 2® Type II certification. This independent audit affirms that Hoyack's systems and processes meet the highest standards for data security, availability, and confidentiality.

> Earning SOC 2 is more than a compliance checkbox—it's a reflection of how we operate as a company. Security and trust are at the foundation of everything we deliver."
>
> *Brandon Cross, Hoyack CEO*

The certification underscores Hoyack's dedication to safeguarding client data while building scalable, future-ready solutions for industries where trust and reliability are non-negotiable.

"Earning SOC 2 is more than a compliance checkbox—it's a reflection of how we operate as a company," said Brandon Cross, CEO of Hoyack. "From AI development to enterprise consulting, security and trust are at the foundation of everything we deliver."

The SOC 2 framework, developed by the American Institute of Certified Public Accountants (AICPA), sets a benchmark for how technology companies manage customer data. Hoyack's certification provides added assurance for organizations looking to partner with a provider that takes both innovation and protection seriously.

About Hoyack
