

Resolvr Secures Seed Funding Led by Axiom to Revolutionize Insurance with Bitcoin

Resolvr secures seed funding, led by Axiom, to expand its BDIC™ network, embedding Bitcoin-denominated insurance directly within crypto platforms.

MIAMI, FL, UNITED STATES, September 16, 2025 /EINPresswire.com/ -- [Resolvr](#), a Bitcoin-native insurance technology company, today announced it has secured seed funding led by Bitcoin-focused venture firm Axiom, with participation from Plan B Fund and Dr. Adam Back, the influential cryptographer, cypherpunk, and CEO of Blockstream.

Resolvr's innovative technology integrates Bitcoin-denominated insurance directly into Bitcoin platforms, enhancing security and accessibility for users.

Resolvr provides essential risk management infrastructure for every participant in the Bitcoin ecosystem. The company's BDIC™ (Bitcoin Denominated Insurance Collaborative) is a first-of-its-kind embedded insurance network. It connects partner platforms—like custodians, wallets, and

exchanges—to a global marketplace of regulated insurance carriers, allowing them to offer their customers licensed, bitcoin-denominated coverage on their assets directly within their products.

“

Building out risk markets is a crucial next step to realizing the future of finance on Bitcoin, and Resolvr's approach is aligned with the core principles of Bitcoin.”

Dr. Adam Back

“In the 17th century, merchants gathered in London coffee houses to underwrite voyages, creating the world's first insurance market. We are building the digital version of that coffee house for the Bitcoin economy,” said Aaron Daniel, CEO of Resolvr. “True financial sovereignty must include the tools to protect it. BDIC™ embeds a global

insurance marketplace directly into the wallets and platforms people already use, making the experience as seamless as adding travel insurance to a flight.”

Joining the round are seasoned angel investors Zac Townsend, Nic Carter, Bob Burnett, Alvaro Sol, Ry Sterling, and Tony Miltenberger.

The new capital will accelerate the rollout of Resolvr's BDIC™ embedded insurance network across multiple partner platforms with coverage from several providers. The funds will also be used to expand the marketplace by developing bitcoin-native vehicles to augment insurance capacity and deliver bitcoin-native yield.

"A natural part of Bitcoin's continuing adoption and normalization is a robust ecosystem of financial services built on its own terms. Resolvr is developing a crucial component of the next stage of infrastructure buildout," said Allen Farrington, co-founder and General Partner of Axiom. "Resolvr's technology is not just an incremental improvement; it's a categorical leap forward. We are proud to back a team that is strengthening the network for everyone."

"The maturation of the Bitcoin ecosystem is demonstrated by the emergence of sophisticated infrastructure like Resolvr," said Blockstream CEO, Dr. Adam Back. "Building out risk markets is a crucial next step to realizing the future of finance on Bitcoin, and Resolvr's approach is aligned with the core principles of Bitcoin."
