Driving Factors : Smart Government Market

Increase in adoption of digital platforms and devices such as smartphones and tablets leading companies to invest more in technological developments and growing use of the internet drive the growth of the global webtoons market. However, only online availability of reading webtoons and limited availability of webtoons' chapters which are not enough to generate a print edition impede the growth of the market. Moreover, growing use of digital comics leading to a reduction in need for drawing instruments such as screen tone and drawing pens is expected to generate potential opportunities for the market during the forecast period.

Market Segmentation : Smart Government Market

The smart government market is segmented into component, type, deployment model, and region. By component, the market is categorized into solution and service. Depending on type, it is segregated into analytics, security, remote monitoring, network management, government resource planning system, participatory democracy and others. By deployment model, it is on-premise and cloud. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Key Players : Smart Government Market

The key players operating in the global smart government market include ABB Ltd., Amazon Web Services, Inc., Avaya Inc., Capgemini S.A., Cisco Systems, Inc., CitizenLab, Decidim, Huawei Technologies Co., Ltd., Imex Systems Inc., Nokia Corporation.

Region wise, the smart government market size was dominated by North America in 2021. The existence of well-established ICT infrastructure in the North American area has aided in the expansion of the smart government industry in the region.

On the basis of type, the government resource planning system segment attained the highest growth during 2021. This is attributed to the increase in adoption of digital technologies by government for planning the use of resources in an effective way. Furthermore, the surge in reliance on statistical and analytical data generated by the GRP software is fueling the growth of the segment in smart government market.
