

AllegroGraph Named a 2025 Trend Setting Product by KMWorld

Franz's Neuro-Symbolic AI Platform, AllegroGraph, Recognized for Delivering Next Generation AI Solutions for the Enterprise

LAFAYETTE, CA, UNITED STATES,
September 17, 2025 /

EINPresswire.com/ -- [Franz Inc.](#), an early innovator in Artificial Intelligence (AI) and leading supplier of Graph Database technology for Neuro-Symbolic AI Solutions, today announced that [AllegroGraph](#) has been named a [2025 Trend Setting Product](#).

"The technologies that keep knowledge management operations humming are constantly evolving," commented KMWorld editor-in-chief Marydee Ojala. "Trend-setting products are proof of how companies embrace innovation and apply emerging AI capabilities to strengthen content generation, summarization, collaboration, access, and personalization for knowledge sharing. They build previously unimagined tools and applications. KMWorld's list of trend-setting products highlights companies that push knowledge management forward and deliver measurable value to their customers."

"We are honored to receive this industry recognition," said Dr. Jans Aasman, CEO, Franz Inc. "It is a testament to the critical role that Knowledge Graphs play in creating the next generation of AI-driven applications. Neuro-Symbolic AI represents the next evolution of Artificial Intelligence,

AllegroGraph - 2025 Trend Setting Product

AllegroGraph - Franz Inc.

where the integration of symbolic reasoning with machine learning delivers unparalleled accuracy, interpretability, and versatility. This approach advances AI technology and ensures that complex decision-making processes are transparent and reliable, setting new benchmarks for the industry.”

Franz Inc. was also recently listed as a Neuro-Symbolic AI vendor in Gartner’s 2025 Hype Cycle for AI in recognition of AllegroGraph’s Neuro-Symbolic AI capabilities. According to Gartner, “Neurosymbolic AI addresses limitations in current AI systems, such as incorrect outputs, lack of generalization to a variety of tasks and an inability to explain the steps that led to an output. The neurosymbolic approach leads to more powerful, versatile and interpretable AI solutions and allows AI systems to reason through more complex tasks. Generative AI systems are starting to leverage neurosymbolic methods to overcome their reasoning shortcomings.” Source: Gartner, Hype Cycle for Artificial Intelligence, July 2025.

“AI requires structured knowledge,” said Charles Betz, VP Principal Analyst at Forrester. “GenAI and large language models (LLMs) require structured and contextualized data. Graphs provide a foundational knowledge model that enhances AI-driven automation, reasoning, and prediction. If unstructured data and the LLMs and vector databases that make sense of it are like flesh, graphs are the skeleton, the bones that give it structure. You need both.” Source: Forrester, The Graphic Future of IT Management, March 2025.

About AllegroGraph

AllegroGraph is the first Neuro-Symbolic AI Platform that fuses machine learning (statistical AI) with symbolic AI, enabling it to solve complex problems with fewer data and provide explainable outcomes. This unique combination expands its use across a wide range of tasks and enhances human interpretability of AI decisions. AllegroGraph has led the AI Knowledge Graph market through technologic breakthroughs including a robust Natural Language Query interface that translates user questions into SPARQL queries, powered by a vector database that supports continual learning—offering built-in GraphRAG capabilities for Agentic AI. The platform also enables collaborative improvement of query examples through metadata tracking (author, editor, timestamps) and a structured tabular view for efficient management.

AllegroGraph’s VectorStore connects enterprise documents with Knowledge Graphs—unlocking access to previously hidden “dark data” and enabling deep insights with advanced security. The platform offers unparalleled security through a unique ‘triple-attributes’ mechanism that provides highly granular access control by embedding security at the data-element level.

AllegroGraph also delivers symbolic rule generation for transparent, rule-based AI decisions, along with a hosted, free Knowledge Graph-as-a-Service platform (<https://allegrograph.cloud>). Enhanced scalability through improved FedShard™ performance, and the integration of Gruff v9—now featuring ChatStream for natural language querying and RDF-Star visualization—make AllegroGraph a powerful, secure, and user-friendly platform for enterprise-grade AI.

About Franz, Inc.

Franz Inc. stands at the forefront of AI innovation, offering Neuro-Symbolic AI solutions that transform complex data into actionable and comprehensible insights. The company's flagship platform, AllegroGraph, merges the analytical strength of deep learning with the precision of logical reasoning, establishing itself as a critical resource for Enterprises aiming to capitalize on the latest advancements in AI technology. Catering to an array of needs from intricate data integration and cutting-edge analytics to the creation of dynamic Knowledge Graphs, Franz Inc. delivers potent, scalable, and accessible solutions designed to navigate the complexities of today's data-driven environments. For more information, visit www.franz.com and www.allegrograph.com.
