

Golden Section Invests in Skrive.ai

Houston VC backs fast growing legal tech startup modernizing testimony capture and analysis.

AUSTIN, TX, UNITED STATES, September 23, 2025 / EINPresswire.com/ -- [Skrive.ai](https://skrive.ai), the legal tech company redefining how testimony is captured, analyzed, and shared, today announced that [Golden Section](#), a Houston based venture capital firm, has invested in its Seed Extension round. The investment underscores confidence in Skrive's vision to become the category leader in testimony intelligence.

Founded by attorney Karl Seelbach and former court reporting firm owner Tom Irby, Skrive.ai combines video first workflows and AI powered tools to eliminate the delays and costs of traditional court reporting. Attorneys use Skrive to schedule, capture, and instantly access interactive video transcripts of depositions, examinations under oath, and other testimony events.

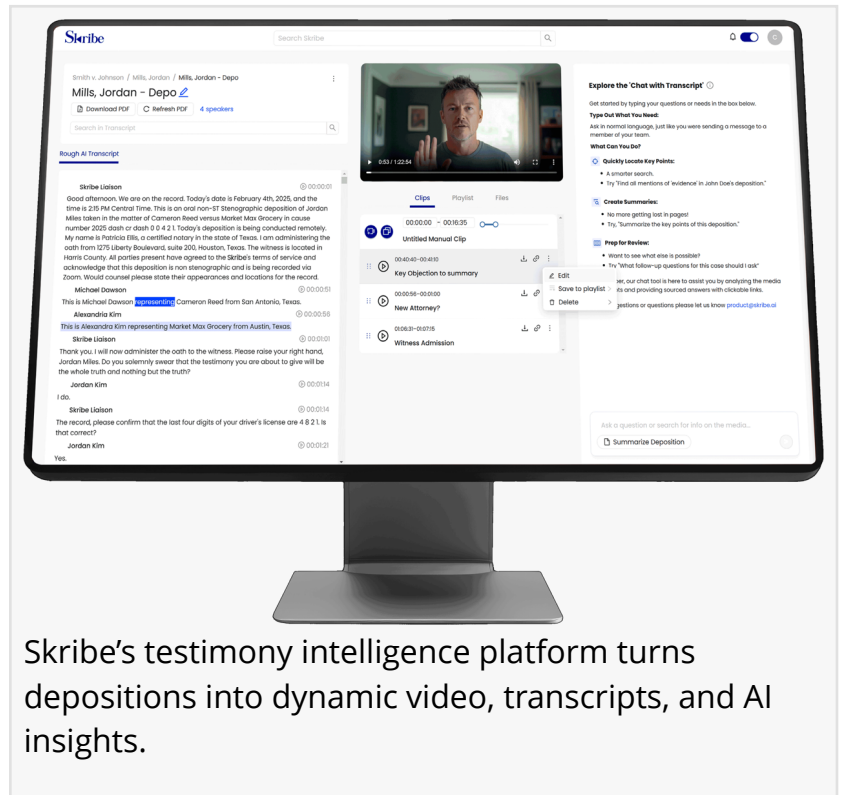

“

Skrive is positioned to scale responsibly, leverage AI, and transform how the legal industry approaches testimony.”

Dougal Cameron, CEO & Co Founder, Golden Section

“Golden Section is more than an investor. They are a partner that understands how to scale SaaS companies and build category defining businesses,” said Tom Irby, CEO & Co Founder of Skrive.ai. “Their support fuels our mission to modernize court reporting, accelerate access to justice, and build the foundation for the world’s first [testimony intelligence platform](#).”

“We love what Skrive is building and see a strong path ahead,” said Dougal Cameron, CEO and Co Founder of Golden Section. “The fit between their solution and the market is clear, and we believe the opportunity to further leverage AI will only accelerate their growth. Skrive is well positioned to scale responsibly and redefine how the legal industry approaches testimony.”

The Seed Extension round strengthens Skribe's runway ahead of a planned priced round in 2026. Funds will be used to expand adoption among attorneys, accelerate development of Skribe's AI driven features, and build enterprise grade infrastructure for national scale.

Skribe has already processed thousands of deposition hours, with hundreds of attorneys and law firms using the platform nationwide. In addition, Skribe recently launched its AI-Only Pilot Program, giving firms a powerful and compliant pathway to leverage AI in testimony capture.

Skribe.ai: The first testimony intelligence platform for the legal industry.

About Skribe.ai

Skribe.ai is transforming how the legal system captures, analyzes, and shares testimony. Its video first, AI powered platform reduces costs, speeds up case timelines, and increases access to justice. With adoption across hundreds of law firms and attorneys, Skribe is building the industry's first testimony intelligence platform, empowering legal teams to leverage data, insights, and video transcripts in ways never before possible.
