Construction 3D printing is a process for printing concrete, polymer, metal, or other materials layer by layer using a 3D printer to create construction pieces or full buildings. The most prevalent form of printer is one that uses a robotic arm to extrude concrete back and forth. Furthermore, 3-dimension printers are totally automated, removing the possibility of human mistake. In addition, the rise in government investments in the approaching construction sector expansion is expected to boost the 3D printing construction industry during the forecast period.

Various governments take initiatives to enhance the living standard of citizen. For instance, in June 2022, the plan of UAE government to construct approximately 25% of new buildings in Dubai as per 3D printed buildings technology by 2032. In order to attain this target, government has selected CyBe construction. Hence, these investments are expected to provide significant growth in 3D Printing Construction Market.

North-America accounted for the largest share of the global market and dominated the global 3D printing construction market in terms of revenue in 2023 owing to expansion of residential and commercial sectors. However, Asia Pacific is expected to register highest CAGR during the forecast period. This is due to increase in R&D investments in developing countries and rise in government investments day-by-day in construction of buildings and infrastructures.

However, during the COVID-19 pandemic, various manufacturers in the 3D printing construction market had to stop their business in countries such as China, the U.S., and India. This break directly impacted the sales of 3D printing construction companies. In addition, lack of manpower and raw materials also constricted supply of equipment for 3D printing construction, which negatively influenced the 3D printing construction market growth. Moreover, reopening of production facilities and introduction of vaccines for coronavirus disease are anticipated to lead to re-opening of 3D printing construction companies. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA. In 2023, Asia-Pacific had the highest 3D printing construction market share and is anticipated to secure the leading position during the forecast period, due to extensive demand in the construction & infrastructure segment.

3D Printing Construction Market Report Highlights

By Construction Method

Extrusion

Power bonding

By Material Type

Concrete

Metal

Composite

By End-user

Buildings

Infrastructure

By Region

North America (U.S., Canada, Mexico)

Europe (France, Germany, Italy, UK, Rest of Europe)

Asia-Pacific (China, Japan, India, South Korea, Rest of Asia-Pacific)

LAMEA (Latin America, Middle East, Africa)

Key Findings Of The Study

The report provides an extensive analysis of the current and emerging global 3D printing construction market trends and dynamics.

Depending on material type, the concrete has dominated the 3D printing construction market, in terms of revenue in 2023 and the metal segment is projected to grow at a significant CAGR during the forecast period.

By construction method, the extrusion segment has registered highest revenue in 2023.

Asia-Pacific is projected to register highest growth rate in the coming years.

The key players within the global 3D printing construction market are profiled in this report, and their strategies are analyzed thoroughly, which help understand competitive outlook of the 3D printing construction industry.

The report provides an extensive analysis of the current trends and emerging opportunities of the market.

In-depth global 3D printing construction market analysis is conducted by constructing estimations for the key segments between 2023 and 2032.

The global 3D printing construction market forecast analysis from 2023 to 2032 is included in the report.

The region and countries are analyzed thoroughly, which help understand the competitive outlook of the 3D printing construction market opportunity.

About US:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports Insights" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions

and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
