

Total Show Technology Expands Rental Inventory with beMatrix 1.5mm LEDskin Panels to Support Exhibit Builder Success

TST provides exhibit builders with industry-leading LED display technology, strategic booth integration, and dependable onsite performance.

LAS VEGAS, NV, UNITED STATES, September 17, 2025 / EINPresswire.com/ -- [Total Show Technology](#) (TST), the trusted AV production partner for trade shows, conferences, and live events, announced today the purchase of beMatrix 1.5mm LEDskin panels for its rental inventory. As a [beMatrix bePartner](#), TST has expanded its rental inventory with this acquisition to better support exhibit builders and exhibitors with immersive, high-resolution displays that integrate seamlessly into booth designs.

Las Vegas-based Total Show Technology just added beMatrix 1.5mm LEDskin panels to the company's rental inventory.

The new LEDskin panels, featuring 1.5mm pixel pitch and advanced COB (FC) technology, deliver unmatched clarity, color, and reliability. Designed to fit perfectly into the original beMatrix b62 frame system, they offer exhibit builders the flexibility to design booths that combine structure and technology without compromise. From product launches and corporate showcases to high-end retail activations, these panels set a new standard for exhibit impact.

"Exhibit builders need AV solutions that not only look incredible but also integrate smoothly and perform dependably under pressure," said Rick Pollock, President of TST. "By adding beMatrix 1.5mm LEDskin panels to our inventory, we're giving exhibit builders and their clients access to the sharpest, brightest, and most reliable LED technology available. At the same time, we're giving them the confidence to design bold, visually stunning booths that engage attendees and deliver results."

With this investment, TST strengthens its position as the foremost AV production leader in Las Vegas and the Pacific Southwest. TST also serves as a trusted partner to exhibit builders nationwide, combining industry-leading technology with AVIXA-certified technicians and proven expertise in pre-show planning, onsite execution, and risk reduction.
