- Dr. Liana Watson, DM, R.T.(R)(M)(S)(BS)(ARRT), RDMS, RVT, FASRT, CAE, PMP, ICE-CCP, CEO ARRT

RadSite™

Accreditation Reinvented

Advanced Diagnostic Imaging Accreditation

“Remote scanning has taken off throughout the United States, so it is important to ensure the continuity and excellence of MRI and CT scanning services in hospitals and outpatient imaging centers,” notes Amy Peronace, MS, CRA, RT(R)(M), VP of Operations, RemoteRadTech. “I am looking forward to sharing my thoughts on the key elements related to staffing, operations and quality assurance activities to promote the best quality and outcomes related to diagnostic imaging.”

RadSite has been tracking remote scanning for MRI and CT outpatient imaging since 2021, and has recently launched the first standalone accreditation program in the U.S. for remote scanning. This webinar will focus on the essential role and responsibilities of the in-suite aides, also referred to as imaging assistants, who are co-located with the imaging system. These onsite staff members provide essential support to patients and remote scanning technologists. Our panel of experts will discuss the qualifications and experience required to ensure the continuity and integrity of imaging when the scanning technologist is remote. This interactive and dynamic session will cover current challenges in the field and key methods on how to optimize remote scanning programs.

“With the widespread use of remote scanning operations and the need to ensure that similar safety practices are put into place as with conventional scanning, RadSite decided to create a formal accreditation program to help standardize key

###

About RadSite™ (www.RadSiteQuality.com)

Founded in 2005, RadSite promotes quality-based practices for imaging systems across the United States and its territories. RadSite is recognized by The Centers for Medicare & Medicaid Services as an official accreditation organization under the Medicare Improvements for Patients and Providers Act of 2008. RadSite is also recognized by more than 350 payers and has accredited more than 2,000 imaging systems. The agency’s programs help assess, track, and report imaging trends to enhance imaging procedures and outcomes. RadSite also offers educational programs, publishes issue briefs, and underwrites research on a complimentary basis to raise awareness of safety issues and to promote best practices. The organization is governed by an independent advisory board and committee system, which is open to a wide range of volunteers to ensure transparency and accountability. To learn more, contact us at 443-440-6007 or info@radsitequality.com.
