

# Digital Education Market Size to Reach \$125.3 Billion by 2031 | CAGR 26%

WILMINGTON, NEW CASTLE, DE, UNITED STATES, September 18, 2025 /EINPresswire.com/ -- Allied Market Research published a report, titled, "[Digital Education Market](#)" by Learning Type (Self-paced Online Education, Instructor-led Online Education), by Course Type (Science, Technology, Engineering, and Mathematics (STEM), Business Management, Others), by End-user (Academic Institutions & Individuals, Enterprises): Global Opportunity Analysis and Industry Forecast, 2021-2031." According to the report, the global digital education industry generated \$12.5 billion in 2021, and is estimated to reach \$125.3 billion by 2031, witnessing a CAGR of 26% from 2022 to 2031. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

## Drivers and Opportunities

Rise in the adoption of advanced technologies in digital education, increase in penetration of smartphones and the internet, and surge in use of AI and machine learning in digital education drive the growth of the global digital education market. However, factors such as lack of social interactions in digital education and high cost of implementation hamper the market growth. On the other hand, emergence of several trends such as micro learning, gamification, adoptive learning and mobile learning are expected to present lucrative opportunities for growth in the coming years.

Covid-19 Scenario

The outbreak of the COVID-19 pandemic led the digital education industry to shift their business operations toward remote work environment. Moreover, strict guidelines issued by governments around the globe made people stay at home. This led to the adoption of digital education globally. Thus, the pandemic had a positive impact on the digital education market.

The pandemic transformed the working model of the educational sector due to greater focus on online working models. After the outbreak of the pandemic, countries including the U.S., Italy, China, and other developed countries were one of the first countries to adopt online education courses and teaching methodologies, creating a higher investment scenario within the market for educational technology.

The self-paced online education segment to maintain its dominance during the forecast period

Based on learning type, the self-paced online education segment grabbed more than three-fifths of the global digital education market in 2021, and is expected to rule the roost during the forecast period as self-paced online education can be implemented across different platforms, websites, PCs and mobile apps. However, the instructor-led online education segment is projected to witness the largest CAGR of 27.3% from 2022 to 2031 as it enables real time doubt clarification and two-way interactions.

The STEM segment to maintain its leadership status during the forecast period

Based on course type, the science, technology, engineering, and mathematics (STEM) segment contributed to nearly three-fourths of the global digital education industry in 2021, and is expected to maintain its leadership status during the forecast period. This is due to the upsurge in the number of virtual schools providing STEM courses. However, the business management segment is projected to witness the largest CAGR of 30.1% from 2022 to 2031, owing to the surge in number of jobs in the field of business management.

The academic institutions & individuals segment to maintain its lead position during the forecast period

Based on end user, the academic institutions & individuals segment accounted for nearly three-fourths of the global digital education market in 2021, and is expected to maintain its lead position during the forecast period, owing to the increase in internet penetration and e-learning initiatives. However, the enterprises segment is projected to manifest the fastest CAGR of 28.8% during the forecast period due to the adoption of digital education by workers to keep up with latest technologies and skills.

North America to maintain its dominance in terms of revenue by 2031

Based on region, North America was the largest market in 2021, accounting for nearly two-fifths of the global digital education market, and is expected to maintain its dominance during the forecast period. This is due to higher adoption of digital education in various colleges and enterprises in the region. However, Asia-Pacific is projected to manifest the fastest CAGR of 29.0% during the forecast period, owing to the growing digital infrastructure and rise in virtual colleges in the region.
