Driving Factors

The rising concerns about food safety, increasing healthcare costs, the ease of access to different food safety testing techniques, and the growing demand for nutritious & balanced food components are the factors expected to drive the growth of the global food safety monitoring system market in the forecast period from 2023 to 2032. Digitization of food safety in the food sector and the rising regulatory standard and stringent food safety regulations are expected to offer remunerative opportunities for the expansion of the food safety monitoring system market during the forecast period.

Market Segmentation

The global data center networking market is segmented into Component and End User. By component, it is bifurcated into solution and services. By end-user, it is segregated into IT and telecom, retail, BFSI, public sector and utilities, energy, manufacturing, healthcare, and others. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Key Players

Leading players of the global data center networking market analyzed in the research include Broadcom Corp, Cisco Systems Inc., Dell Technologies Inc., HPE, Lenovo Group, IBM, Intel Corporation, Juniper Networks Inc., Microsoft Corporation, Oracle Corporation, HUAWEI TECHNOLOGIES CO. LTD, Fujitsu Ltd., ALCATEL-LUCENT ENTERPRISE, Pluribus Networks, VMware Inc., Console Connect, and Edge Micro.

Based on region, the market in North America was the largest in 2021, accounting for more than two-fifths of the global data center networking market share and is likely to maintain its leadership status during the forecast period. However, the market in Asia-Pacific is expected to manifest the highest CAGR of 14.7% from 2022 to 2031. The other regions analyzed in the study include LAMEA and Europe.

Based on component, the solution segment held the largest share in 2021, accounting for nearly three-fourths of the global data center networking market and would maintain its dominance in terms of revenue through 2031. However, the services segment is estimated to witness the fastest CAGR of 13.4% during the forecast period.

Based on end user, the IT and telecom segment held the largest share in 2021, capturing more than one-fourth of the global data center networking market, and would lead the trail through 2031. The healthcare segment, on the other hand, is estimated to witness the fastest CAGR of 15.7% during the forecast period. The report also discusses retail, BFSI, public sector and utilities, energy, manufacturing and others segments.

COVID-19 Scenario

- The COVID-19 pandemic outbreak had a significant impact on the growth of the data center networking market. It led to a complete shutdown of manufacturing and production across the globe.

- The global economy was also severely impacted by this pandemic, which further generated hurdles for many industries and businesses globally.

- On the other hand, the data traffic increased significantly during the pandemic. The growth of technologies such as the Internet of Things (IoT), big data and artificial intelligence (AI) resulted in an upsurge in need for storage volume. This upsurge has driven the investments in data center networking globally, thereby contributing to the market growth.

Thanks for reading this article, you can also get an individual chapter-wise section or region-wise report versions like North America, Europe, or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly, this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into market dynamics and will enable strategic decision-making for existing market players as well as those willing to enter the market.
